

# Table of Contents

## **Section 1 - Fundamental concepts and basic science**

- 1.1: Atherosclerosis - Disease mechanisms and clinical consequences, Ulf Hedin and Göran K Hansson
- 1.2: Primary and secondary prevention strategies in atherosclerosis, Stephen J Nicholls
- 1.3: Restenosis in vascular surgical practice - molecular biology and strategies for prevention, Thomas Koepfel and Andreas Schober
- 1.4: Vasculitides and fibromuscular dysplasia, Catherine Hill, Scott Graf and Robert Fitridge
- 1.5: Chronic lower limb ischaemia - therapeutic angiogenesis, Edward Choke and Mark McCarthy
- 1.6: Clotting mechanisms and haemophilias, Ulrike Flierl, Nay Min Htun and Karlheinz Peter
- 1.7: Drugs affecting platelets and coagulation, Nay Min Htun, Ulrike Flierl, Karlheinz Peter
- 1.8: Ischaemia - reperfusion injury, David A Russell, Nadeem A Mughal, Shervanthi Homer-Vanniasinkam
- 1.9: Pathophysiology and management of compartment syndromes in vascular surgery, Mark Hamilton, Prue Cowled, and Robert Fitridge
- 1.10: Peripheral neuropathy and post-amputation pain syndromes, StMark Hamilton, Prue efan Lauer and Stephan A. Schug
- 1.11: Current and future vascular grafts, Mital Desai and George Hamilton
- 1.12: Graft infection, Morgyn Warner, Renjy Nelson, and Chuan Lim
- 1.13: Vascular arterial haemodynamics, Ilija D Šutalo, Michael MD Lawrence-Brown, Kurt Liffman, James B Semmens
- 1.14: Vascular imaging - principles and practice, Andrew Holden, Brigid Connor, Stephen Merrilees and Zubayr Zaman

## **Section 2 - Congenital diseases of the vasculature**

- 2.1: Paediatric vascular surgery, Meryl Davis and George Hamilton
- 2.2: Congenital vascular anomalies, Nigel Stanfield
- 2.3: Vascular tumours, Patrick Coughlin

## **Section 3 - Vascular trauma**

- 3.1: Damage control surgery for vascular trauma, Denis W Harkin
- 3.2: Neck and upper limb vascular trauma, Wayne Sapsford
- 3.3: Blunt traumatic aortic injury, Vijay M Gadhvi, Peter Gogalniceneau and Richard Boulton
- 3.4: Abdominal vascular trauma, Carl Magnus Wahlgren, Louis Riddez and Ulf Hedin
- 3.5: Lower limb vascular trauma, John Devin B Watson and Todd E Rasmussen

## **Section 4 - Lower limb ischaemia and associated conditions**

- 4.1: Acute lower limb ischaemia, D Julian Scott and Jai V Patel
- 4.2: Technical aspects of surgery for lower limb ischaemia, Mark Koelemay
- 4.3: Popliteal and femoral artery aneurysms, Richard Neville, Rodeen Rahbar, Sean Satey and Bao-Ngoc Nguyen
- 4.4: Chronic lower limb ischaemia, Alan G Dawson and Julie Brittenden
- 4.5: Technical aspects of surgery for chronic lower limb ischaemia (aorto-iliac), Gerard Goh, Rob Morgan and Cliff Shearman
- 4.6: Technical aspects of endovascular and open surgery for chronic lower limb ischaemia, Joseph L Mills, Robert J Hinchcliffe and Magdiel Trinidad-Hernandez
- 4.7: Non-atherosclerotic lower limb ischaemia, Robert J Hinchcliffe, Mart Bender, Goof Schep
- 4.8: Diabetic foot, Robert J Hinchcliffe
- 4.9: Lower limb amputation, Jonathan Beard and Wissam Al-Jundi

## **Section 5 - Vascular disease of the upper limb**

- 5.1: Acute upper limb ischaemia, Nung Rudarakanchana
- 5.2: Chronic Atherosclerotic Upper Limb Ischaemia, Colin D Bicknell
- 5.3: Thoracic outlet syndrome, Ali Azzadeh, Sapan Desai, Kristopher Charlton-Ouw, and Hazim J. Safi
- 5.4: Hyperhidrosis, Frank CT Smith
- 5.5: Raynaud's phenomenon, Mike Jenkins and Maresa Carulli

## **Section 6 - Carotid artery disease**

- 6.1: Epidemiology and aetiology of stroke, Fiona Kennedy and Martin M Brow

6.2: Modern medical management of TIA and stroke, Victoria J Haunton and Thompson G Robinson

6.3: Carotid artery disease, Peter M Rothwell

6.4: Technical aspects of carotid revascularisation, A Ross Naylor and Jos van den Berg

6.5: Results of carotid revascularisation, A Ross Naylor

6.6: Vertebrobasilar ischaemia, Hugh Markus

6.7: Non-atherosclerotic carotid disease, Andy Kordowicz and Michael J Gough

6.8: Carotid body tumours, Ross Milner and Trissa Babrowski

6.9: Aneurysms of the extracranial carotid artery, Gert Jan de Borst

### **Section 7 - Abdominal aortic aneurysms**

7.1: Abdominal aortic aneurysms: fundamental concepts, Ian M Nordon

7.2: Screening for abdominal aortic aneurysm, Jonathan Earnshaw

7.3: Clinical features and indications for AAA surgery, Stuart W Grant and Charles N McCollum

7.4: Technical aspects of abdominal aortic aneurysm repair, Paul Hayes

7.5: Technical aspects of surgery for complex aneurysms, Ian Loftus

7.6: Abdominal aortic aneurysms - results of elective surgery, Alan Karthikesalingama and Peter Holt

7.7: Abdominal aortic aneurysms: results of emergency surgery, Alan Karthikesalingam and Peter JE Holt

7.8: Management of complications of aortic reconstruction, Edward Choke, Robert Davies, and Robert Sayers

### **Section 8 - Thoracic and thoracoabdominal aortic pathology**

8.1: Genetic aspects of thoracic ascending aortic aneurysm and dissection (TAAD), Anne H Child, Jose Aragon-Martin and Alexander YB Wan

8.2: Thoracic aortic aneurysms, Rizwan Attia, Rachel Clough and Peter F Taylor

8.3: Thoracic aortic aneurysms: clinical features and indications for surgery, Rachel E Clough

8.4: Technical and clinical aspects of surgery for TAA, Stephen Large and Priya Sastry

8.5: Technical and clinical aspects of surgery for endovascular repair of thoracic aneurysms, Christos Lioupis, Rachel E Clough, Tom W Carrell and Peter R Taylor

8.6: Thoracic aortic dissections, Ian M Nordon

8.7: Type B aortic dissection, clinical features and indication for surgery, Ian M Nordon

8.8: Technical and clinical aspects of surgery for Type B aortic dissections, Ian M Nordon

8.9: Thoracoabdominal aortic aneurysms, Roberto Chiesa, Efrem Civilini, Germano Melissano, Luca Bertoglio and Enrico Rinaldi

8.10: Technical and clinical aspects of surgery for thoracoabdominal aneurysms, Roberto Chiesa, Efrem Civilini, Yamume Tshomba, Enrico Maria Marone and Germano

### **Section 9 - Mesenteric and renal vascular disease**

9.1: Renovascular disease, B Rigden Green and Michael G Wyatt

9.2: Mesenteric ischaemia, James E Coulson and Peter M Lamont

9.3: Visceral Artery Aneurysms, Alistair M Millen and Srinivasa Rao Vallabhaneni

### **Section 10 - Diseases of the veins and lymphatics**

10.1: Varicose Veins, A H Davies and A C Shepherd

10.2: Technical Aspects of Varicose Vein Surgery, Karan Garg, Lowell S Kabnick and Mark A Adelman

10.3: Results of treatment of varicose veins, Manj Gohel

10.4: Acute Lower Limb DVT, Anthony J Comerota and Vijay Kamath

10.5: Chronic venous insufficiency, Katy Darvall and Andrew Bradbury

10.6: Treatment of lower limb deep vein obstruction, Peng Wong and Gerard Stansby

10.7: Treatment of lower limb and pelvic deep vein incompetence, Cees Wittens and Mark de Wolf

10.8: Chronic cerebro-spinal venous insufficiency, Paolo Zamboni, Sergio Giancesini and Erica Menegatti

10.9: Lymphatics, lymphoedema its assessment , treatment and management, Neil Piller
