Preface.
Contributors.

VOLUME 1.

PART I: BASIC NEUROPHARMACOLOGY.

Chapter 1: Soup or Sparks: The History of Drugs and Synapses (William Van der Kloot).

Chapter 2: Synaptic Transmission: Intercellular Signaling (J. David Jentsch and Robert H. Roth).

Chapter 4: Neuronal Nicotinic Receptors: One Hundred Years of Progress (Kenneth J. Kellar and Yingxian Xiao).

Chapter 5: Muscarinic Acetylcholine Receptors (Jürgen Wess).

Chapter 6: Norepinephrine/Epinephrine (Megan E. Kozisek and David B. Bylund).

Chapter 7: Dopaminergic Neurotransmission (John A. Schetz and David R. Sibley).

Chapter 8: Serotonin Systems (John A. Gray and Bryan L. Roth).

Chapter 9: Neuropharmacology of Histamine in Brain (Raphae¨l Faucard and Jean-Charles Schwartz).

Chapter 10: Ionotropic Glutamate Receptors (David Bleakman, Andrew Alt, David Lodge, Daniel T. Monaghan, David E. Jane, and Eric S. Nisenbaum).

Chapter 11: Metabotropic Glutamate Receptors (James A. Monn, Michael P. Johnson, and Darryle D. Schoepp).

Chapter 12: Pharmacology of the GABAA Receptor (Dmytro Berezhnoy, Maria C. Gravielle, and David H. Farb).

Chapter 13: Metabotropic GABA Receptors (Martin Gassmann and Bernhard Bettler).
Chapter 14: Voltage-Gated Ion Channels (Alex Fay, Patrick C. G. Haddick, and Lily Yeh Jan).

Chapter 15: Neuropeptides (Fleur L. Strand).

Chapter 16: Neurotransmitter Transporters (Jia Hu, Katherine Leitzell, Dan Wang, and Michael W. Quick).

PART II: MOOD DISORDERS.

Chapter 18: Neurobiology and Treatment of Depression (Alexander Neumeister, Dennis S. Charney, Gerard Sanacora, and John H. Krystal).

Chapter 19: Neurotrophic Factors in Etiology and Treatment of Mood Disorders (Ronald S. Duman).

Chapter 20: Antidepressant Treatment and Hippocampal Neurogenesis: Monoamine and Stress Hypotheses of Depression Converge (Alex Dranovsky and René Hen).

Chapter 21: Neuroendocrine Abnormalities in Women with Depression Linked to the Reproductive Cycle (Barbara L. Parry, Charles J. Meliska, L. Fernando Martinez, Eva L. Maurer, Ana M. Lopez, and Diane L. Sorenson).

Index.

Cumulative Index.

VOLUME 2.

PART I: ANXIETY AND STRESS DISORDERS.

Chapter 1: Neurobiology of Anxiety (Miklos Toth and Bojana Zupan).

Chapter 2: Pharmacotherapy of Anxiety (Jon R. Nash and David J. Nutt).

Chapter 3: Benzodiazepines (Hartmut Lu¨ddens and Esa R. Korpi).
Chapter 4: Neuroactive Steroids in Anxiety and Stress (Deborah A. Finn and Robert H. Purdy).

PART II: SCHIZOPHRENIA AND PSYCHOSIS.

Chapter 7: Phenomenology and Clinical Science of Schizophrenia (Subroto Ghose and Carol Tamminga).

Chapter 8: Dopamine and Glutamate Hypotheses of Schizophrenia (Bita Moghaddam and Houman Homayoun).

Chapter 9: Molecular Genetics of Schizophrenia (Liam Carroll, Michael C. O'Donovan, and Michael J. Owen).

Chapter 10: Postmortem Brain Studies: Focus on Susceptibility Genes in Schizophrenia (Shiny V. Mathew, Shruti N. Mitkus, Barbara K. Lipska, Thomas M. Hyde, and Joel E. Kleinman).

Chapter 11: Pharmacotherapy of Schizophrenia (Zafar Sharif, Seiya Miyamoto, and Jeffrey A. Lieberman).

Chapter 12: Atypical Antipsychotic Drugs: Mechanism of Action (Herbert Y. Meltzer).

PART III: SUBSTANCE ABUSE AND ADDICTIVE DISORDERS.

Chapter 13: Introduction to Addictive Disorders: Implications for Pharmacotherapies (Mary Jeanne Kreek).

Chapter 14: Dopaminergic and GABAergic Regulation of Alcohol-Motivated Behaviors: Novel Neuroanatomical Substrates (Harry L. June and William J. A. Eiler II).

Chapter 15: Nicotine (August R. Buchhalter, Reginald V. Fant, and Jack E. Henningfield).

Chapter 16: Psychostimulants (Leonard L. Howell and Heather L. Kimmel).

Chapter 17: MDMA and Other "Club Drugs" (M. Isabel Colado, Esther O'Shea, and A. Richard Green).
Chapter 18: Marijuana: Pharmacology and Interaction with the Endocannabinoid System (Jenny L. Wiley and Billy R. Martin).

Chapter 19: Opiates and Addiction (Frank J. Vocci).

PART IV: PAIN.

Chapter 20: Neuronal Pathways for Pain Processing (Gavril W. Pasternak and Yahong Zhang).

Chapter 21: Vanilloid Receptor Pathways (Makoto Tominaga).

Chapter 22: Opioid Receptors (Gavril W. Pasternak).

Chapter 23: Advent of A New Generation of Antimigraine Medications (Ana Recober and Andrew F. Russo).

Index.

Cumulative Index.

VOLUME 3.

PART I: SLEEP AND AROUSAL.

Chapter 1: Function and Pharmacology of Circadian Clocks (Gabriella B. Lundkvist and Gene D. Block).

Chapter 2: Melatonin Receptors in Central Nervous System (Margarita L. Dubocovich).

Chapter 3: Narcolepsy: Neuropharmacological Aspects (Seiji Nishino).

Chapter 4: Hypocretin/Orexin System (J. Gregor Sutcliffe and Luis de Lecea).

Chapter 5: Prokineticins: New Pair of Regulatory Peptides (Michelle Y. Cheng and Qun-Yong Zhou).

Chapter 6: Sedatives and Hypnotics (Keith A. Wafford and Paul J. Whiting).

PART II: DEVELOPMENT AND DEVELOPMENTAL DISORDERS.

Chapter 7: Regulation of Adult Neurogenesis (Heather A. Cameron).

Chapter 8: Neurotrophic Factors (Franz F. Hefti and Patricia A. Walicke).
Chapter 9: Neurotrophins and Their Receptors (*Mark Bothwell*).

Chapter 10: Tourette’s Syndrome and Pharmacotherapy (*Pieter Joost van Wattum and James F. Leckman*).

Chapter 11: Neuropharmacology of Attention-Deficit/Hyperactivity Disorder (*Paul E. A. Glaser, F. Xavier Castellanos, and Daniel S. Margulies*).

Chapter 12: Psychopharmacology of Autism Spectrum Disorders (*Adriana Di Martino, Steven G. Dickstein, Alessandro Zuddas, and F. Xavier Castellanos*).

**PART III: NEURODEGENERATIVE AND SEIZURE DISORDERS.**

Chapter 13: Stroke: Mechanisms of Excitotoxicity and Approaches for Therapy (*Michael J. O’Neill, David Lodge, and James McCulloch*).

Chapter 14: Epilepsy: Mechanisms of Drug Action and Clinical Treatment (*William H. Theodore and Michael A. Rogawski*).

Chapter 15: Pharmacotherapy for Traumatic Brain Injury (*Donald G. Stein and Stuart W. Hoffman*).

Chapter 16: Dementia and Pharmacotherapy: Memory Drugs (*Jerry J. Buccafusco*).

Chapter 17: Pharmacotherapy and Treatment of Parkinson’s Disease (*Wing Lok Au and Donald B. Calne*).

Chapter 18: Parkinson’s Disease: Genetics and Pathogenesis (*Claudia M. Testa*).

**PART IV: NEUROIMMUNOLOGY.**

Chapter 20: Myelin Lipids and Proteins: Structure, Function, and Roles in Neurological Disorders (*Richard H. Quarles*).

Chapter 21: Pharmacology of Inflammation (*Carmen Espejo and Roland Martin*).

Chapter 22: Pharmacological Treatment of Multiple Sclerosis (*B. Mark Keegan*).
Chapter 23: Novel Therapies for Multiple Sclerosis (Martin S. Weber and Scott S. Zamvil).

PART V: EATING AND METABOLIC DISORDERS.

Chapter 28: Antiobesity Pharmacotherapy: Current Treatment Options and Future Perspectives (Yuguang Shi).

Index.

Cumulative Index.
