

## Table of Contents

Contributor list;

### Part I. The Regulation of Cancer:

1. The type 1 growth factor receptor family, their ligands and their role in human cancers T. Rajkumar and W. J. Gullick;
2. The fibroblast growth factor family and their receptors Pita Enriquez Harris and John K. Heath;
3. The biological role of transforming growth factor beta in cancer development Bradley A. Arrick and Rik Derynck;
4. Bombesin and its receptor Michael J. Seckl and Enrique Rozengurt;
5. Gonadotrophin-releasing hormone and its receptor Karin A. Eidne and Lorraine Anderson;
6. Cytokines T. Hamblin; Part II. The Prevention of Endocrine-Dependent Tumours:
7. Familial Cancer Audrey D. Goddard and Donald M. Black;
8. Diet Peter Boyle and Patrick Maisonneuve;
9. Breast cancer: new biological approaches to treatment Robert B. Dickson and Robert Clarke;
10. The biological basis for the treatment of prostate cancer Jonathan Waxman, Andrew Stubbs and Hardev Pandha;
11. Carcinoid tumours S. Bloom and P. Hammond; Part III. Endocrine Complications of Cancer Treatment:
12. Humoral hypercalcaemia John J. Wysolmerski and Arthur E. Braodus;
13. Anaemia of cancer Carole B. Miller and Jerry L. Spivak; Index.
