

INDICE DEI CAPITOLI

Perioperative treatment and optimal medical therapy for endovascular interventions

Zoltán Jambrik

Practical perioperative non-invasive assessment before intervention

Csaba Nagy

Access site selection for peripheral interventions

Zoltán Ruzsa

Transradial access for peripheral artery interventions

Olivier F. Bertrand, Zoltán Ruzsa

Transbrachial access for endovascular interventions

András Nagy

Transfemoral access for endovascular interventions

Antony Krajna

Transpedal access for lower limb interventions

Tak Kwan

Aorto-iliac endovascular interventions: step by step approach

Ivo Petrov

Femoral interventions

Lukasz Drelicharz, Stanislaw Bartus

Below-the-knee intervention: antegrade access

Balázs Nemes

Retrograde access for below-the-knee interventions and plantar arch reconstruction

Zoltán Ruzsa

Visceral artery intervention

Balázs Nemes

Subclavian and vertebral artery intervention

Sasko Kedev

Carotid artery revascularization using the endovascular route

Piotr Musalek

Hybrid vascular surgery

László Pintér
