

## CONTENTS

<b>1. Introduction</b>	<b>1</b>
<i>Gergana T. Taneva, Konstantinos P. Donas</i>	
<b>2. Alternative and complementary diagnostic modalities</b>	
<b>2.1. Use of intravascular ultrasound in peripheral arterial disease</b>	<b>4</b>
<i>Konstantinos P. Donas</i>	
<b>2.2. Carbon dioxide angiography for peripheral interventions</b>	<b>8</b>
<i>Georgios I. Karaolanis, Gergana T. Taneva, Konstantinos P. Donas</i>	
<b>3. Lesion preparation modalities</b>	
<b>3.1. Lesion preparation modalities overview</b>	<b>18</b>
<i>Grigorios Korosoglou, Michael Lichtenberg, Martin Andrassy</i>	
<b>3.2. Directional atherectomy</b>	<b>34</b>
<i>Martin Andrassy, Grigorios Korosoglou</i>	
<b>3.3. Rotational atherectomy</b>	<b>39</b>
<i>Gergana T. Taneva</i>	
<b>3.4. Orbital atherectomy</b>	<b>49</b>
<i>Konstantinos P. Donas, Patricia Torres Labruno, Gergana T. Taneva</i>	

<b>3.5. Plaque modifying modalities: special balloons</b>	<b>53</b>
<i>Majid Kazemtash, Gergana T. Taneva, Konstantinos P. Donas</i>	
<b>4. Drug eluting-balloon angioplasty in the femoropopliteal segment</b>	<b>58</b>
<i>Gergana T. Taneva</i>	
<b>5. Scaffolding for the treatment of femoropopliteal arterial lesions: bare metal, covered, and drug-eluting stents</b>	<b>72</b>
<i>Gergana T. Taneva, José Gil Sales, Adriana Vera Artrácoz, José Porto Rodríguez</i>	
<b>6. Use of mechanical aspirational thrombectomy for thrombus-containing calcified acute on chronic lesions</b>	<b>88</b>
<i>Konstantinos P. Donas, Majid Kazemtash, Gergana T. Taneva</i>	
<b>7. Decisional algorithm for endovascular treatment of calcified popliteal artery lesions based on an European registry</b>	<b>94</b>
<i>Nicola Troisi, Athanasios Sartzis, Konstantinos Stavroulakis, Raffaella Berchiolli, Hany Zayed, Giovanni Torsello, EMO-POP registry Collaborative Group</i>
