Abnormal Laboratory Results

Foreword

Preface to the third edition

Contributors

Acknowledgments

Part 1 General Issues

1 What to do about abnormal laboratory results

2 Abnormal laboratory results

3 What does the reference range of a biochemical screen test mean?

4 Pitfalls in interpreting laboratory results

5 Moving beyond sensitivity and specificity: using likelihood ratios to help interpret diagnostic tests

6 Point-of-care testing comes of age in Australia

7 Urine testing

Part 2 Biochemistry Tests

8 Plasma sodium

9 Serum potassium

10 Serum urea

11 Assessing renal function

12 Interpreting arterial blood gases

13 Calcium and vitamin D

14 Magnesium: the forgotten electrolyte

15 Hyperuricaemia

16 Liver function tests

- 17 Interpretation and significance of high blood cholesterol
 - 18 Managing hyperlipidaemia: criteria for investigating lipids
 - 19 New cardiac markers
 - 20 B-type natriuretic peptide: a new diagnostic tool for congestive heart failure
 - 21 Thyroid function tests
 - 22 Evaluating adrenocortical function in adults
 - 23 The glucose tolerance test
 - 24 Diabetes monitoring: use of glycated haemoglobin and glycated protein assays
 - 25 Fertility testing
 - 26 Biochemical tests in pregnancy
 - 27 Biochemical tests for abnormalities in pregnancy
 - 28 Interpreting paediatric biochemistry results
 - 29 Drug screens
 - 30 Therapeutic drug monitoring: which drugs, why, when and how to do it
- Part 3 Haematology Tests
- 31 The red cells
 - 32 Interpreting biochemical tests for iron deficiency: diagnostic difficulties imposed by the limitations of individual tests
 - 33 Appropriate use of tests for folate and vitamin B deficiency
 - 34 Screening for thalassaemia and haemoglobin variants
 - 35 Investigations for thrombotic tendencies
 - 36 Tests of haemostasis: detecting the patient at risk of bleeding

37 Abnormal haematology results in children

Part 4 Microbiology Tests

38 Hepatitis B: laboratory diagnosis and vaccination

39 Hepatitis C: laboratory diagnosis and monitoring

40 HIV testing in Australia

41 Testing for sexually transmitted infections

42 Testing for *Helicobacter pylori*

Part 5 Immunology Tests

43 Screening for multiple myeloma

44 Testing cell-mediated immunity

45 Cell markers

46 Skin prick testing and in vitro assays for allergic sensitivity

47 Antinuclear antibodies (ANA)

48 Rheumatoid factor and anti-citrullinated peptide antibody

Part 6 Genetic Tests

49 BRCA testing for familial breast cancer

Index
