

Table of contents

Section I: Overview of Anemia

1. Principles of Anemia Evaluation
2. Anemia and Age
3. Anemia and Ethnicity
4. Anemia and Pregnancy
5. Cancer and Anemia
6. Malaria and the Red Cell

Section II: Nutrition and Anemia

7. Iron Deficiency
8. Nutritional Anemias

Section III: Hormone Deficiency

9. Anemia and Endocrine Hormones

Section IV: Stem Cell Dysfunction

10. Pediatric Bone Marrow Failure Syndromes
11. Acquired Bone Marrow Failure Syndromes
12. The Myelodysplastic Syndromes

Section V: Hemoglobin Disorders

13. Sickle Cell Disease
14. Thalassemia

Section VI: Enzymopathies

15. G6PD Deficiency
16. Pyruvate Kinase Deficiency

Section VII: Membrane Disorders

17. Anemias Associated with Erythrocyte Membrane

Section VIII: Immune Dysfunction

18. Erythroblastosis Fetalis (Immune Hemolytic Disease of the Newborn)
19. Immune Hemolytic Anemia
