

Table of contents

1. Anatomy of the Genitourinary Tract
 2. Embryology of the Genitourinary System
 3. Symptoms of Disorders of the Genitourinary Tract
 4. Physical Examination of the Genitourinary Tract
 5. Urologic Laboratory Examination
 6. Radiology of the Urinary Tract
 7. Vascular Interventional Radiology
 8. Percutaneous Endourology & Ureterorenoscopy
 9. Laparoscopic Surgery
 10. Retrograde Instrumentation of the Urinary Tract
 11. Urinary Obstruction & Stasis
 12. Vesicoureteral Reflux
 13. Bacterial Infections of the Genitourinary Tract
 14. Specific Infections of the Genitourinary Tract
 15. Sexually Transmitted Diseases
 16. Urinary Stone Disease
 17. Injuries to the Genitourinary Tract
 18. Immunology & Immunotherapy of Urologic Cancers
 19. Chemotherapy of Urologic Tumors
 20. Urothelial Carcinoma: Cancers of the Bladder, Ureter, & Renal Pelvis
 21. Renal Parenchymal Neoplasms
 22. Neoplasms of the Prostate Gland
 23. Genital Tumors
 24. Urinary Diversion & Bladder Substitution
 25. Radiotherapy of Urologic Tumors
 26. Neurophysiology & Pharmacology of the Lower Urinary Tract
 27. Neuropathic Bladder Disorders
 28. Urodynamic Bladder Disorders
 29. Urinary Incontinence
 30. Diagnosis of Medical Renal Diseases
 31. Disorders of the Kidneys
 32. Diagnosis of Medical Renal Diseases
 33. Oliguria; Acute Renal Failure
 34. Chronic Renal Failure & Dialysis
 35. Renal Transplantation
 36. Disorders of the Ureter & Ureteropelvic Junction
 37. Disorders of the Bladder, Prostate, & Seminal Vesicles
 38. Male Sexual Dysfunction
 39. Female Urology & Female Sexual Dysfunction
 40. Disorders of the Penis & Male Urethra
 41. Disorders of the Female Urethra
 42. Skin Diseases of the External Genitalia
 43. Abnormalities of Sexual Determination & Differentiation
 44. Male Infertility
 45. The Aging Male
- Appendix: Normal Laboratory Values
