

Table of contents

Contents

PART 1: Structure and Function of the Cell and Bio-molecules

1. The Cell 3
2. Carbohydrate Chemistry 20
3. Chemistry of Lipid 40
4. Chemistry of Proteins 61
5. Plasma Proteins and Immunoglobulins 90
6. Enzymes 104
7. Vitamins 129
8. Chemistry of Haemoglobin 153
9. Chemistry of Nucleic Acid 166

PART 2: Energy Metabolism, Nutrition and Metabolism of Bio-molecules

10. Bioenergetics and Biological Oxidation 185
11. Human Nutrition 205
12. Carbohydrate Metabolism 218
13. Lipid Metabolism 265
14. Protein Metabolism 319
15. Integration of Metabolism and Metabolism in Starvation 363
16. Water Metabolism 373
17. Mineral Metabolism 379
18. Haemoglobin Metabolism 398
19. Nucleic Acid Metabolism 406

PART 3: Biochemistry of Cellular Communication

20. Mechanism of Hormone Action 423
21. Neurotransmitters 432

PART 4: Molecular Biology

22. Replication, Transcription and Translation 443
23. Regulation of Gene Expression and Mutation 478
24. Genetic Engineering 488

PART 5: Clinical Biochemistry

25. Acid-Base Balance 501
26. Organ Function Tests 511
27. Coronary Heart Disease (CHD), Cardiac Markers and Lipid Profile 525
28. Radioisotopes in Medicines 536

PART 6: Health, Disease and Environment

29. Free Radicals in Health and Disease and Antioxidants 543
30. Metabolism of Xenobiotics (Detoxification) 549
31. Cancer 555
32. Acquired Immunodeficiency Syndrome (AIDS) 564
33. Environment and Health 569
34. Biomedical Waste Management 576

PART 7: Biochemistry of the Tissue

35. Connective Tissue 585
36. Muscle 595

PART 8: Basic Analytical Techniques in Biochemistry

37. Chromatography, Electrophoresis, Photometry and Radioimmunoassay 609
