

Table of Contents

Section 1: Corneal Refractive Surgery;

Chapter 1. Refractive Errors of the Eye;

Chapter 2. Basic Optics of Refractive Surgery;

Chapter 3. Pathophysiology of Various Refractive Errors Like Myopia, Hyperopia, Astigmatism, Accommodation and Presbyopia;

Chapter 4. Orbscan;

Chapter 5. Photorefractive Keratectomy with Mitomycin C for High Myopia;

Chapter 6. Photorefractive Keratectomy after Penetrating Keratoplasty;

Chapter 7. Phototherapeutic Keratectomy on Recurrent Corneal Erosions;

Chapter 8. Myopic Photorefractive Keratectomy Using Solid State Laser;

Chapter 9. Photorefractive Keratectomy for Residual Myopia following Radial Keratotomy;

Chapter 10. Recent Advances in Photorefractive Keratectomy;

Chapter 11. Painless EpiLASIK;

Chapter 12. Wavefront-guided Photorefractive Keratectomy—Today and the Future;

Chapter 13. Presby-EpiLASIK in Pseudophakic Eyes with the Wavelight Allegretto;

Chapter 14. EpiLASIK with Mitomycin C;

Chapter 15. One-shot Epithelium-rhexis: Personal Technique;

Chapter 16. Surface Ablation after Laser In Situ Keratomileusis; Retreatment on the Flap;

Chapter 17. Wavefront Analysis and its Clinical Significance;

Chapter 18. Wavefront LASIK;

Chapter 19. Aspheric Ablation with Nidek Platform;

Chapter 20. Customized Excimer Laser Treatment Using the Wavelight Allegretto Eye Q Laser;

Chapter 21. Advances EpiLASIK and LASEK;

Chapter 22. Wavefront Optimize and Astigmatism correction with the Allegretto Excimer Laser;

Chapter 23. Aberropia: A New Refractive Entity;

Chapter 24. Topographic and Aberrometer Guided Laser;

Chapter 25. Refractive Change after RK;

Chapter 26. LASIK Complications and Management;

Chapter 27. Cross-linking Plus Topography-guided PRK for Post-LASIK Ectasia Management;

Chapter 28. PRK for Low to Moderate Myopia;

Chapter 29. LASEK Procedure with the Use of Mitomycin C;

Chapter 30. Transepithelial Cross-linking for the Treatment of Keratoconus;

Chapter 31. Sub Bowman's Keratomileusis: Combining the Best of PRK and LASIK for Optimal Outcomes;

Chapter 32. cTENTM- Custom Transepithelial "No-touch, One-step, All-laser" Refractive and Therapeutic Ablations with the iVISTM suite;

Chapter 33. Astigmatism;

Chapter 34. Customized LASIK for Presbyopia: PMLTM (Presbiopic Multifocal LASIK Technique);

Chapter 35. Amblyopia;

Chapter 36. Laser Scleral Ablation for True Accommodation for Presbyopia;

Chapter 37. Solid State Lasers for Refractive Surgery 360;

Chapter 38. Dry Eye after Refractive Surgery;

Chapter 39. Corneal Biomechanical Properties;

Chapter 40. Future of LASIK Surgery; Section 2: Lenticular Refractive Surgery;

Chapter 41. Refractive Management of Hyperopia;

Chapter 42. Restoration of Accommodation by Capsular Bag Refilling;

Chapter 44. Mini Incision IOL Implantation—Current Scenario;

Chapter 45. Monofocal HOA Free IOL to Correct Secondary Presby-LASIK;

Chapter 46. Managing Intraoperative Floppy Iris Syndrome;

Chapter 47. Artisan, Toric Artisan and Artiflex Phakic Intraocular Lenses;

Chapter 48. Orthokeratology IOLs;

Chapter 49. Aspheric IOLs (Wavefront Based I);

Chapter 50. Dual Optic Accommodative IOL;

Chapter 51. Anterior Chamber Phakic IOL with Angle Fixation;

Chapter 52. Advances in Microphakinit for Refractive Lens Exchange (MIRLEX)—A New Technique;

Chapter 53. Blue Light Filtering Intraocular Lenses;

Chapter 54. Refractive Lens Exchange: Current Perspectives;

Chapter 55. Advances in Optic Designs to Reduce PCO;
