

## **Table of contents**

### **I. Overview of Radical and Reconstructive Pelvic Surgery**

1. Historical Evolution
2. Relevant Gynecologic, Urologic, and Colorectal Malignancies
3. Surgical Anatomy

### **II. Extirpative Operations**

4. Radical Hysterectomy
5. Radical Vulvectomy
6. Radical Cystectomy
7. Abdominoperineal Resection
8. Pelvic Extenteration
9. Laterally Extended Endopelvic Resection
10. Symphisectomy / Ischiectomy / Hemipelvectomy

### **III. Reconstructive Operations**

#### Part A: Urinary Tract

11. Incontinent Diversions
12. Continent Diversions
13. Bladder and Ureteral Substitution / Augmentation

#### Part B : Gastrointestinal Tract

14. Colorectal Anastomosis and Colostomy
15. Ileal Pouch Anal Anastomosis

#### Part C: Vulvovaginal and Pelvic Floor Reconstruction

16. Omental Flap, Skin Grafts?
17. Rectus Abdominus Flaps, Pudendal Thigh?
18. Gracillis, Tensor Facia Lata, Vastus Lateralis?

#### Part D: Management of Complex Abdominal Wall Defects

19. Tissue Rearrangement Techniques

### **IV. Supportive Care**

20. Rehabilitation, Quality of Life, and Symptom Management
