

Contents

Section I: Population Health

Chapter 1: Populations

- a. Community
- b. Region
- c. Country
- d. Global
- e. Special populations

Chapter 2: Metrics

- a. Prevalence
- b. Incidence rate
- c. Mortality rate
- d. Infant mortality
- e. Life expectancy
- f. Years of potential life lost
- g. Disability-adjusted life years

Chapter 3: Patterns of Occurrence

- a. Age
- b. Race/ethnicity
- c. Gender
- d. Geographic
- e. Temporal

Chapter 4: Global Burden of Disease

- a. Study design and goals
- b. Mortality patterns
- c. Healthy life expectancy
- d. Disability-adjusted life years
- e. Risk factors

Chapter 5: Social Determinants of Health

- a. Definition
- b. Whitehall Study
- c. Education
- d. Income
- e. Housing
- f. Food security
- g. Physical and social environment

Chapter 6: Health Disparities

- a. Health Inequities
- b. Social determinants
- c. Culture
- d. Discrimination
- e. Access to care
- f. Quality of care

Section II. Collecting Evidence for Medical Practice

Chapter 7: Clinical trials

- a. Design
- b. Subject selection
- c. Randomization
- d. Blinding
- e. Analysis
- f. Sample size
- g. Limitations

Chapter 8: Cohort studies

- a. Design
- b. Subject selection
- c. Exposure assessment
- d. Analysis
- e. Limitations

Chapter 9: Case-control studies

- a. Design
- b. Subject selection
- c. Matching
- d. Exposure assessment
- e. Analysis
- f. Limitations

Chapter 10: Diagnostic tests

- a. Sensitivity and specificity
- b. Positive and negative predictive value
- c. Likelihood ratios
- d. ROC Curves
- e. Limitations

Section III. Assessing Evidence for Medical Practice

Chapter 11: Comparative effectiveness

- a. Definition
- b. Objectives
- c. Approaches
- d. Systematic reviews
- e. PICOTS principles

Chapter 12: Planning a review

- a. Selecting a topic
- b. Key informants
- c. Analytic framework

Chapter 13: Finding evidence

- a. Study eligibility
- b. Types of studies
- c. Grey literature
- d. Possible bias
- e. Search process
- f. Extracting data
- g. Reporting methods

Chapter 14: Assessing the evidence

- a. Data extraction
- b. Study quality
- c. Study applicability

d. Summary table

e. Evidence Maps

Chapter 15: Quantitative synthesis

a. Summary measures

b. Heterogeneous results

c. Subgroup analysis

d. Grading strength of evidence

e. Reporting results

Section IV: Translating Evidence into Medical Practice
