

# TABLE OF CONTENTS

1. Assessment of Critically Ill Patients and Families
2. Planning Care for Critically Ill Patients
3. Interpretation and Management of Basic Cardiac Rhythms
4. Hemodynamic Monitoring
5. Airway and Ventilatory Management
6. Pain, Sedation, and Neuromuscular Blockade Management
7. Pharmacology
8. Ethical and Legal Considerations
9. Cardiovascular System
10. Respiratory System
11. Multisystem Problems
12. Neurological System
13. Hematologic and Immune Systems
14. Gastrointestinal System
15. Renal System
16. Endocrine System
17. Trauma
18. Advanced ECG Concepts
19. Advanced Cardiovascular Concepts
20. Advanced Respiratory Concepts: Models of Ventilation
21. Advanced Neurologic Concepts
22. Normal Values Table
23. Pharmacology Tables
24. Advanced Cardiac Life Support Algorithms
25. Hemodynamic Troubleshooting Guide
26. Cardiac Rhythms, ECG Characteristic and Treatment Guide
