

Table of Contents:

Section I: Basis of Disease Pathogenesis

A. Genetics

- 1 Major histocompatibility complex class II
- 2 Genetic susceptibility and class III complement genes
- 3 Constitutive genes and lupus
- 4 Genetics of lupus in mice

B. Cellular Pathogenesis

- 5 Tolerance and autoimmunity
 - 6 Dendritic cells in SLE
 - 7 T cells and systemic lupus erythematosus
 - 8 B-lymphocyte biology in SLE
 - 9 Polymorphonuclear and endothelial cells
 - 10 Mechanisms and consequences of mitochondrial dysfunction and oxidative stress in T cells of patients with SLE
 - 11 Cell cycle regulation and systemic lupus erythematosus
 - 12 The role of reactive nitrogen and oxygen intermediates in systemic lupus erythematosus
 - 13 Origins of antinuclear antibodies
 - 14 Anti-DNA antibodies: Structure, regulation and pathogenicity
 - 15 Extractable nuclear antigens and SLE: specificity and role in disease pathogenesis
 - 16 Antihistone and antispliceosomal antibodies
 - 17 Toll-like receptors in SLE
 - 18 Interferon-alpha in systemic lupus erythematosus
 - 19 Immune complexes in systemic lupus erythematosus
 - 20 Complement and tissue injury in SLE
 - 21 Humoral pathogenesis: Fc receptors in autoimmunity and end-organ damage
- #### D. Environmental Aspects of Pathogenesis
- 22 Drug-induced lupus mechanisms

- 23 Gender and age in lupus
- 24 Roles for infections in systemic lupus erythematosus pathogenesis
- 25 Systemic lupus erythematosus in domestic animals
- E. Mechanisms of Tissue Injury
- 26 Pathogenesis of lupus nephritis
- 27 Tissue injury and the skin
- 28 Neuropsychiatric systemic lupus erythematosus: Mechanisms of injury
- 29 Fibrosis and tissue injury in systemic lupus erythematosus

Section II: Clinical Aspects of Disease

A. Clinical Presentation

- 30 The clinical presentation of systemic lupus erythematosus
- 31 Neonatal lupus
- 33 Drug-induced disease
- 34 Laboratory evaluation of patients with systemic lupus erythematosus
- 35 Pregnancy and reproductive concerns in systemic lupus erythematosus
- 36 Epidemiology of systemic lupus erythematosus
- 37 Monitoring disease activity
- 38 Incomplete lupus erythematosus
- 39 Design of clinical trials for SLE

B. Organ Systems

- 40 The nervous system and lupus
- 41 Skin
- 42 Kidney
- 43 Heart
- 44 Vasculitis
- 45 Lung
- 46 Gastrointestinal: Liver

47 Gastrointestinal: Nonhepatic

48 Cellular hematology

49 Musculoskeletal system: Articular disease, bone metabolism

Section III: Anti-Phospholipic Syndrome

A. Pathogenesis

50 Antiphospholipid antibody: Pathogenesis

51 Endothelial cell damage and atherosclerosis

B. Clinical

52 Laboratory testing for antiphospholipid syndrome

53 Clinical presentation of antiphospholipid syndrome

54 Pregnancy and antiphospholipid syndrome

55 Treatment of antiphospholipid syndrome

Section IV: Treatment

56 Steroids and nonsteroidal anti-inflammatory drugs

57 Antimalarials

58 Cytotoxic agents

59 Biological agents
