**Table of Contents:**

**Part I Basic Tools in Routine Evaluation of Cardiac Patients**

**Chapter 1**

* History Taking * Gestational and Natal History * Postnatal History * Family History

**Chapter 2**

* Physical examination * Growth Pattern * Inspection * Palpation * Blood Pressure Measurement * Auscultation * Some Special Features of the Cardiac Examination of Neonates

**Chapter 3**

* Electrocardiography * What Is the Vectorial Approach? * Comparison of Pediatric and Adult Electrocardiograms * Basic Measurements and Their Normal and Abnormal Values Necessary for Routine Interpretation of an Electrocardiogram * Ventricular Hypertrophy * Ventricular Conduction Disturbances * ST-Segment and T-Wave Changes

**Chapter 4**

* Chest Roentgenography * Heart Size and Silhouette * Evaluation of Cardiac Chambers and Great Arteries * Pulmonary Vascular Markings * Systematic Approach

**Chapter 5**

* Flow Diagrams

**Part II Special Tools in Evaluation of Cardiac Patients**

**Chapter 6**

* Noninvasive Techniques * Echocardiography * Stress Testing * Long-Term ECG Recording * Ambulatory Blood Pressure Monitoring

**Chapter 7**

* Invasive Procedures * Cardiac Catheterization and Angiocardiography * Catheter Intervention Procedures

**Part III Pathophysiology**

**Chapter 8**
* Fetal and Perinatal Circulation * Fetal Circulation * Changes in Circulation after Birth * Premature Newborns

**Chapter 9**

* Pathophysiology of Left-to-Right Shunt Lesions * Atrial Septal Defect * Ventricular Septal Defect * Patent Ductus Arteriosus * Endocardial Cushion Defect

**Chapter 10**

* Pathophysiology of Obstructive and Valvular Regurgitation Lesions * Obstruction to Ventricular Output * Stenosis of Atrioventricular Valves * Valvular Regurgitant Lesions

**Chapter 11**

* Pathophysiology of Cyanotic Congenital Heart Defects * Clinical Cyanosis * Common Cyanotic Heart Defects

**Part IV Specific Congenital Heart Defects**

**Chapter 12**

**Chapter 13**

* Obstructive Lesions * Pulmonary Stenosis * Aortic Stenosis * Coarctation of the Aorta * Interrupted Aortic Arch

**Chapter 14**

* Cyanotic Congenital Heart Defects * Approach to a Cyanotic Neonate * Complete Transposition of the Great Arteries * Congenitally Corrected Transposition of the Great Arteries * Tetralogy of Fallot * Tetralogy of Fallot with Pulmonary Atresia (Pulmonary Atresia and Ventricular Septal Defect) * Tetralogy of Fallot with Absent Pulmonary Valve * Total Anomalous Pulmonary Venous Return * Tricuspid Atresia * Pulmonary Atresia with Intact Ventricular Septum * Hypoplastic Left Heart Syndrome * Ebstein's Anomaly * Persistent Truncus Arteriosus * Single Ventricle * Double-Outlet Right Ventricle * Heterotaxia (Atrial Isomerism, Splenic Syndromes) * Persistent
Pulmonary Hypertension of the Newborn

Chapter 15

* Vascular Ring * Prevalence * Pathology * Clinical Manifestations * Diagnosis * Management

Chapter 16

* Chamber Localization and Cardiac Malposition * Chamber Localization * Dextrocardia and Mesocardia

Chapter 17

Part V Acquired Heart Disease

Chapter 18

* Primary Myocardial Disease * Hypertrophic Cardiomyopathy * Infants of Diabetic Mothers * Transient Hypertrophic Cardiomyopathy in Neonates * Dilated or Congestive Cardiomyopathy * Endocardial Fibroelastosis * Doxorubicin Cardiomyopathy * Carnitine Deficiency * Restrictive Cardiomyopathy * Right Ventricular Dysplasia * Noncompaction Cardiomyopathy

Chapter 19

* Cardiovascular Infections * Infective Endocarditis * Myocarditis * Pericarditis * Constrictive Pericarditis * Kawasaki Disease * Lyme Carditis * Postpericardiotomy Syndrome * Postperfusion Syndrome * Human Immunodeficiency Virus Infection

Chapter 20

* Acute Rheumatic Fever * Prevalence * Cause * Pathology
* Congestive Heart Failure * Definition * Cause * Pathophysiology of Congestive Heart Failure * Diagnosis * Management

**Chapter 28**

* Systemic Hypertension * Definition * Normative Blood Pressure Standards * Cause * Diagnosis and Workup * Management * Hypertensive Crisis

**Chapter 29**

* Pulmonary Hypertension * Definition * Cause * Physiology * Pathogenesis * Pathology * Pathophysiology * Clinical Manifestations * Natural History * Diagnosis * Management * Bronchopulmonary Dysplasia * Diaphragmatic Hernia

**Chapter 30**

* Child with Chest Pain * Cause and Prevalence * Clinical Manifestations * Diagnostic Approach * Management

**Chapter 31**

* Syncope * Prevalence * Definition * Causes * Evaluation of a Child with Syncope * Treatment * Differential Diagnosis

**Chapter 32**

* Palpitation * Definition and Description * Causes * Evaluation * Management

**Chapter 33**

* Dyslipidemia and Other Cardiovascular Risk Factors * Childhood Onset of Coronary Artery Disease * Cardiovascular Risk Factors and Metabolic Syndrome * Dyslipidemia * Other Risk Factors * Practice of Preventive Cardiology

**Chapter 34**

* Athletes with Cardiac Problems * Sudden Unexpected Death in Young Athletes * Preparticipation Screening * Classification of Sports * Eligibility Determination for Athletes with Cardiovascular Diseases * Cardiac Arrhythmias and Sports * Athletes with Systemic Hypertension

**Chapter 35**
* Cardiac Transplantation * Indications * Selection of the Recipient * Evaluation and Management of the Cardiac Donor * Informed Consent from the Family and Recipient * Operative Technique * Early Postoperative Management * Late Post-Transplantation Follow-up * Prognosis

**Appendices**

Appendix A Miscellaneous  
Appendix B Blood Pressure Values  
Appendix C Cardiovascular Risk Factors  
Appendix D Normal Echocardiographic Values and Images  
Appendix E Drugs Used in Pediatric Cardiology  
Suggested Readings  
Index
