Table of Contents:

Part I: General Considerations

1. The History of Pain Medicine
2. Taxonomy and Classification of Chronic Pain Syndromes
3. Organizing an Inpatient Acute Pain Service
4. Measurement-Based Stepped Care Approach to Interdisciplinary Chronic Pain Management
5. The Health Care Policy of Pain Management
6. Quality Assessment and Improvement and Patient Safety in the Pain Clinic
7. Education, Training, and Certification in Pain Medicine

Part II. Basic Considerations

8. Pain Pathways: Peripheral, Spinal, Ascending, and Descending Pathways
9. A Review of Pain-Processing Pharmacology
10. Pain and Brain Changes
11. An Introduction to Pharmacogenetics in Pain Management: Knowledge of How Pharmacogenomics May Affect Clinical Care
12. Psychosocial Aspects of Chronic Pain

Part III. Evaluation and Assessment

13. History and Physical Examination of the Pain Patient
14. Electromyography and Evoked Potentials
15. Radiologic Assessment of the Patient with Spine Pain
16. Psychological and Behavioral Assessment
17. Disability Assessment

Part IV. Clinical Conditions

18. Postoperative Pain and Other Acute Pain Syndromes
19. The Prediction and Prevention of Persistent Post-Surgical Pain
20. Pediatric Acute Pain Management
21. Low Back Pain
22. Neurosurgical Approaches to Pain Management
23. Cancer Pain
24. Neuropathic Pain Syndromes
25. Pain in Selected Neurologic Disorders
26. Phantom Limb Pain
27. Central Post-stroke Pain Syndrome
28. Spinal Cord Injury Pain
29. Chronic Widespread Pain
30. Headache Management
31. Dental and Facial Pain
32. Visceral Pain
33. Pediatric Chronic Pain Management
34. Management of Pain in Older Adults
35. Managing Pain during Pregnancy and Lactation

**Part V. Pharmacologic, Psychological, and Physical Medicine Treatments**

36. Major Opioids and Chronic Opioid Therapy
37. Minor and Short-Acting Analgesics, Including Opioid Combination Products
38. Antidepressants as Analgesics
39. Membrane Stabilizers for the Treatment of Pain
40. Nonsteroidal Anti-inflammatory Drugs, Acetaminophen, and COX-2 Inhibitors
41. Skeletal Muscle Relaxants
42. Topical Analgesics
43. Neuraxial Agents
44. Pharmacology for the Interventional Pain Physician
45. Psychological Interventions
46. Physical Medicine Techniques in Pain Management
47. Physical Rehabilitation for Patients with Chronic Pain
48. Acupuncture
49. Integrative Approaches to Pain Management
50. Pain and Addictive Disorders: Challenge and Opportunity
51. Issues Associated with Opioid Use

**Part VI. Nerve Block Techniques**

52. Nerve Blocks of the Head and Neck
53. Upper Extremity Blocks
54. Lower Extremity Nerve Blocks
55. Truncal Blocks
56. Peripheral and Visceral Sympathetic Blocks
57. Intraarticular Analgesia
58. Chemical Neurolytic Blocks
59. Neurolysis of Sympathetic Axis for Cancer Pain Management

**Part VII. Interventional Techniques**

60. Interlaminar and Transforaminal Therapeutic Epidural Injections
61. Pathogenesis, Diagnosis, and Treatment of Zygopophysial (Facet) Joint Pain
62. Radiofrequency Treatment
63. Sacroiliac Joint Syndrome: Sacroiliac Joint Injections and Block/Radiofrequency of the Lateral Branchs
64. Myofascial Injections: Trigger Point, Piriformis, Iliopsoas, and Scalene Injections
65. Lumbar Discogenic Pain and Diskography
66. Intradiscal Procedures for the Treatment of Discogenic Lower Back and Leg Pain
67. Minimally Invasive Procedures for Vertebral Compression Fractures
68. Biopsychosocial Prescreening for Spinal Cord and Peripheral Nerve Stimulation
Devices

69. Spinal Cord and Peripheral Nerve Stimulation

70. Intrathecal Drug Delivery: Patient Selection, Trialing, and Implantation

71. Joint Injections

72. Radiation Safety and Radiographic Contrast Agents in Pain Medicine

Part VIII. Pain Management in Special Situations and Special Topics

73. The Management of Pain from Sickle Cell Disease

74. Burn Pain

75. Pain Management in the Emergency Department

76. Pain Management in the Critically Ill Patient

77. Pain Management at the End of Life

78. Pain Management in the Home: Using Cancer Patients as a Model

79. The Health Implications of Disparities in Cancer and Pain Care: Unequal Burdens and Unheard Voices

Part IX: Research, Ethics, and Reimbursement in Pain

80. Clinical Trial Design Methodology for Pain Outcome Studies

81. Ethics of Research in Patients with Pain

82. Postoperative Pain Management: Trends and Future Directions and Areas in Need of Investigation

83. Future Directions and Trends in Pain Management
