

Table of Contents:**Section 1: EVALUATION**

1. The Physiatric History and Physical Examination
2. History and Examination of the Pediatric Patient
3. Adult Neurogenic Communication and Swallowing Disorders
4. Psychological Assessment and Intervention in Rehabilitation
5. Practical Aspects of Impairment Rating and Disability Determination
6. Employment of People with Disabilities
7. Quality and Outcome Measures for Medical Rehabilitation
8. Electrodiagnostic Medicine

Section 2: TREATMENT TECHNIQUES AND SPECIAL EQUIPMENT

9. Rehabilitation and Prosthetic Restoration in Upper Limb Amputation
10. Lower Limb Amputation and Gait
11. Upper Limb Orthoses
12. Lower Limb Orthoses
13. Spinal Orthoses
14. Wheelchairs and Seating Systems
15. Therapeutic Exercise
16. Manipulation, Traction, and Massage
17. Physical Agent Modalities
18. Integrative Medicine in Rehabilitation
19. Computer Assistive Devices and Environmental Controls

Section 3: COMMON CLINICAL PROBLEMS

20. Bladder Dysfunction
21. Neurogenic Bowel: Dysfunction and Rehabilitation
22. Sexual Dysfunction and Disability
23. Spasticity
24. Chronic Wounds

25. Vascular Diseases
26. Burns
27. Acute Medical Conditions
28. Chronic Medical Conditions : Pulmonary Disease, Organ Transplantation, and Diabetes
29. Cancer Rehabilitation
30. The Geriatric Patient
31. Rheumatologic Rehabilitation

Section 4: ISSUES IN SPECIFIC DIAGNOSES

32. Common Neck Problems
33. Low Back Pain
34. Osteoporosis
35. Upper Limb Pain and Dysfunction
36. Musculoskeletal Disorders of the Lower Limb
37. Chronic Pain
38. Pelvic Floor Disorders
39. Sports Medicine and Adaptive Sports
40. Motor Neuron Diseases
41. Rehabilitation of Patients with Neuropathies
42. Myopathy
43. Traumatic Brain Injury
44. Stroke Syndromes
45. Degenerative Movement Disorders of the Central Nervous System
46. Multiple Sclerosis
47. Cerebral Palsy
48. Myelomeningocele and Other Spinal Dysraphisms
49. Spinal Cord Injury
50. Auditory, Vestibular, and Visual Impairments
