

Table of Contents:

Anatomy and cells of the immune system.

Innate immunity I: physical and humoral protection.

Innate immunology II: cellular mechanisms.

Acquired immunity: antigen receptors.

The human leukocyte antigens.

Cellular immune responses I: dendritic cells, macrophages and B lymphocytes.

Cellular immune responses II: T lymphocytes, antigen presentation and natural killer cells.

The immune response to microbes: an overview.

Tolerance and mechanisms of autoimmunity.

Hypersensitivity reactions and clinical allergy.

Transplantation. Rheumatic diseases. Endocrine autoimmune disease. Liver diseases. Gastrointestinal diseases. Immune-mediated nephritis and vasculitis.

Immune-mediated skin disease. Immune-mediated diseases of the nervous system and eye.

Immunodeficiency. Human immunodeficiency virus and AIDS. Immunological manifestations of haematological disease. Immune-based therapies. Immunisation.
