Table of Contents

Section 2: Neurologic complications of critical illness
Chapter 24: The scope of neurology of critical illness
• Abstract
• Conclusion
Chapter 25: Delirium in critically ill patients
• Abstract
• Introduction
• Epidemiology
• Neuropathology
• Clinical presentation
• Neurodiagnostics and imaging
• Hospital course and management
• Clinical trials and guidelines
• Complex clinical decisions
• Outcome prediction
Chapter 26: Posterior reversible encephalopathy in the intensive care unit
• Abstract
• Introduction
• Epidemiology
• Pathophysiology and neuropathology
• Clinical presentation
• Neurodiagnostics and imaging
• Hospital course and management
• Outcome prediction
• Clinical trials and guidelines
• Complex clinical decisions
• Neurorehabilitation
• Conclusions
Chapter 27: Acute neurotoxicology of drugs of abuse
• Abstract
• Introduction
• MAJOR neurotoxicologic syndromes
• Approach to the patient with an unknown ingestion
• conclusion
Chapter 28: Seizures in the critically ill
• Abstract
• Introduction
• Epidemiology
• Neuropathology
• Clinical presentation
• Neurodiagnostics and imaging
• Hospital course and management
• Clinical trials and guidelines
• Complex clinical decisions
• Outcome prediction
• Injuries related to water (nonfatal drowning and decompression illness)
• Injuries related to extremes of temperature (heat stroke and accidental hypothermia)

Chapter 38: Neurologic manifestations of major electrolyte abnormalities
• Abstract
• Physiologic regulation of sodium and osmolality
• Pathophysiology and adaptive responses to sodium disturbances
• Neurologic manifestations
• Neurologic manifestations of disturbances of other ions

Chapter 39: Management of neuro-oncologic emergencies
• Abstract
• Introduction
• Direct effects of cancer
• Indirect complications of cancer to the nervous system
• Iatrogenic neurologic emergencies
• Conclusion

Chapter 40: Management of neurologic complications of coagulopathies
• Abstract
• Introduction
• Epidemiology
• Neuropathology
• Clinical presentation
• diagnostics and Neuroimaging
• Hospital course and management
• Clinical trials and guidelines
• Complex clinical decisions
• Outcome prediction
• Conclusion

Chapter 41: Prognosis of neurologic complications in critical illness
• Abstract
• Introduction
• Prognosis of ICU-acquired encephalopathy
• Prognosis of hepatic encephalopathy in acute liver failure
• Prognosis of ICU-acquired uremic encephalopathy
• Prognosis of ICU-acquired weakness
• Prognosis of posterior reversible encephalopathy syndrome
• Prognosis of delirium in critically ill patients
• Prognosis of coma after cardiopulmonary resuscitation
• Prognosis of neurologic complications of liver transplantation
• Ethical considerations
