

Table of Contents

Forward

Preface

Abbreviations

2. Comprehensive TTE examination protocol

3. Indications and Contraindications and endpoints of DSE/ESE

4. Useful formulas and normal values

5. Guidelines for the safe use of echocardiography contrast

6. Atrial and Ventricular dimensions

7. Coronary artery territories diagram

8. LV systolic function and LV diastolic patterns

9. RV systolic function and RV diastolic patterns

10. Dilated, Hypertrophic and Restrictive Cardiomyopathies

11. Pericardial effusion, Cardiac Tamponade, Constrictive Pericarditis

12. Mitral Stenosis

13. Mitral valvuloplasty score

14. Recommendations for data recording and measurement for MS

15. Mitral Regurgitation

16. Aortic Regurgitation

17. Aortic Stenosis

18. Recommendations for data recording and measurement for AS

19. Resolution of apparent discrepancies in measures of AS severity

20. Pulmonary HTN, Pulmonic Stenosis, Pulmonic Regurgitation

21. Tricuspid Regurgitation & Tricuspid Stenosis

22. Infective Endocarditis

23. ACC/AASE Recommendations for Echocardiography in IE

24. Prosthetic valves

25. Normal Echocardiographic Values for Prosthetic Valves

26. Congenital heart disease

27. Miscellaneous

28. Aortic diseases

29. Indication for Surgery in Aortic diseases

30. TTE and Doppler protocols for assessment of ventricular dyssynchrony

31. Indications /Contraindications and complications of TEE

32. Routine approach to any TEE view and recommended views for evaluation of aorta
33. TEE probe orientation
34. Diagrams of standard TEE views
35. TEE measurements
36. TEE diagram of the regional blood supply to cardiac wall segments
37. TEE orientation for assessment of the mitral valve
38. Diagrams of TEE views in the evaluation of the mitral valve
39. References and recommended literature
40. Supplement
