Table of Contents
Foreword H. Franklin Bunn
Preface
Introduction David Weatherall

**Part I. The Cellular, Molecular and Genetic Basis of Hemoglobin Disorders:**

**Introduction**

1. The development of hematopoiesis Elaine Dzierzak
2. Erythropoiesis S. Philipsen and W. G. Wood
3. The normal structure regulation of human globin gene clusters Bernard G. Forget and Ross C. Hardison
4. The normal regulation of globin gene expression Gerd A. Blobel and Mitchell J. Weiss
5. The molecular and cellular basis of developmental globin gene switching George Stamatoyannopoulos
6. Structure and function of hemoglobin and its dysfunction in sickle cell disease Daniel Kim-Shapiro
7. Hemoglobins of the embryo, fetus and adult Martin H. Steinberg and Ronald L. Nagel

**Part II. Pathophysiology of Hemoglobin and its Disorders:**

**Introduction**

8. Vascular biology Dhananjat Kaul
9. The erythrocyte membrane Clint Joiner and Patrick Gallagher
10. The biology of vascular nitric oxide Jane A. Leopold and Joseph Loscalzo
11. Mechanisms and complications of hemolysis in sickle cell disease and thalassemia Gregory J. Kato and Mark T. Gladwin
12. The importance of animal models in understanding pathophysiology Mary Fabry

**Part III. a Thalassemia:**

**Introduction:**

13. The molecular basis of alpha thalassemia Douglas R. Higgs and Vip Viprakasit
14. The pathophysiology and clinical features of alpha thalassemia Douglas R. Higgs, Vip Viprakasit and Don Bowden
15. Alpha thalassemia with mental retardation and myelodysplasia Douglas R. Higgs, Richard Gibbons, and David Steensma

**Part IV. Beta Thalassemia:**

**Introduction:**

16. The molecular basis of beta thalassemia S. L. Thein and W. G. Wood
17. Clinical aspects of beta thalassemia and related disorders Nancy F. Olivieri, D. K. Bowden, and D. J. Weatherall
18. HbE disorders Suthat Fuchareon and David Weatherall

**Part V. Sickle Cell Disease:**

**Introduction:**

19. Clinical and pathophysiological aspects of sickle cell anemia Martin Steinberg, Kwaku Ohene-Frempong, and Matthew M. Heeney
20. Biology of pain and treatment of the sickle cell painful episode Samir K. Ballas and James R. Eckman
21. HbSC disease and HbC Martin H. Steinberg and Ronald L. Nagel
22. Sickle cell trait Martin H. Steinberg
23. Other sickle hemoglobinopathies Martin H. Steinberg

Part VI. Other Clinically Important Disorders of Hemoglobin:
Introduction:
24. Unstable hemoglobins: hemoglobins with altered oxygen affinity
hemoglobin M
other variants of clinical and biological interest Martin H. Steinberg and Ronald L. Nagel
25. Dyshemoglobinemias Neeraj Agarwal and Ronald L. Nagel

Part VII. Special Topics in Hemoglobinopathies:
Introduction:
26. Population genetics and global health burden David J. Weatherall and Thomas N. Williams
27. Genetic modulation of sickle cell disease and thalassemia Martin H. Steinberg and Ronald L. Nagel
28. Developments in laboratory methods to detect hemoglobinopathies Mary Fabry and John M. Old

Part VIII. New Approaches to the Treatment of Hemoglobinopathies and Thalassemia:
Introduction:
29. Transfusion and iron chelation John Porter, Alan R. Cohen and Janet L. Kwiatkowski
30. Induction of HbF Yogen Saunthararajah and George F. Atweh
32. Stem cell transplantation Emanuele Angelucci and Mark Walters
