

Table of Contents

- 1: Medical Gas Sources
- 2: Suction Equipment
- 3: The Anesthesia Machine
- 4: Vaporizers
- 5: Breathing Systems
- 6: Anesthesia Ventilators
- 7: Manual Resuscitators
- 8: Controlling Trace Gas Levels
- 9: Humidification Devices
- 10: Hazards of Anesthesia Machines and Breathing Systems
- 11: Latex Allergy
- 12: Face Masks and Airways
- 13: Supraglottic Airway Devices
- 14: Laryngoscopes
- 15: Tracheal Tubes and Associated Equipment
- 16: Double-Lumen Tracheobronchial Tubes, Bronchial Tubes and Bronchial Blocking Devices
- 17: Anesthesia Gas Monitoring
- 18: Airway Pressure, Volume, and Flow Measurements
- 19: Pulse Oximetry
- 20: Neuromuscular Transmission Monitoring
- 21: Alarm Devices
- 22: Noninvasive Blood Pressure Monitoring
- 23: Temperature Monitoring and Control
- 24: Operating Room Fires and Personnel Injuries Related to Sources of Ignition
- 25: Equipment Checking and Maintenance
- 26: Cleaning and Sterilization
