# Table of Contents:

Introduction Shoulder Instability

## SECTION 1: ANATOMY AND PRINCIPLES OF TREATMENT

- Ch 01 Clinical Anatomy and Biomechanics of the Glenohumeral Joint (Including Stabilizers)
- Ch 02 Examination and Classification of Instability
- Ch 03 Beach and Lateral Setup - Pros and Cons
- Ch 04 Open and Arthroscopic Instrumentation for Instability Repair
- Ch 05 Sutures and Glenoid Anchors for Instability

## SECTION 2: ANTERIOR INSTABILITY

- Ch 06 Findings and Pathology Associated with Anterior Shoulder Instability
- Ch 07 Clinical History and Physical Examination
- Ch 08 Radiographic Studies and Findings
- Ch 09 Non-Operative Treatment of Anterior Shoulder Instability
- Ch 10 Non-Operative Rehabilitation for Traumatic and Atraumatic Glenohumeral Instability
- Ch 11 Arthroscopic Treatment of Anterior Instability - Surgical Technique
- Ch 12 Open Treatment of Anterior Instability - Surgical Technique
- Ch 13 Biomechanics of Glenohumeral Bone Loss and Treatment Mechanics
- Ch 14 Radiographic and Arthroscopic Evaluation of Glenoid and Humeral Head Bone Loss
- Ch 15 Arthroscopic Treatment of Glenoid Bone Loss - Surgical Technique
- Ch 16 Open Bony Augmentation of Glenoid Bone Loss -
The Latarjet and Variants - Surgical Technique

Ch17 The Latarjet Procedure - Technique and Fixation Constructs

Ch18 Technique of Arthroscopic Bristow-Bankart Procedure

Ch19 Open Bony Augmentation of Glenoid Bone Loss - Iliac Crest and Allograft - Surgical Technique

Ch20 Humeral Head Defects - Biomechanics, Measurements and Treatments

Ch21 Recent Advances in the Diagnosis and Treatment of Glenohumeral Bone Loss

Ch22 Rehabilitation: Return-to-Play and In-Season Guidelines

SECTION 3: POSTERIOR INSTABILITY

Ch23 Pathology and Biomechanics of Posterior Instability

Ch24 Clinical History, Examination and Surgical Decision Making

Ch25 Imaging Findings in Posterior Instability

Ch26 Arthroscopic Treatment of Posterior Instability

Ch27 Open Surgical Treatment and Posterior Glenoid Bone Loss

Ch28 Rehabilitation after Posterior Instability Repair - Open vs. Arthroscopic

SECTION 4: MULTIDIRECTIONAL INSTABILITY

Ch29 Pathology and Findings in Patients with Multidirectional Instability

Ch30 Clinical History, Examination, Arthroscopic Findings and Treatment of Multidirectional Instability

Ch31 Non-Operative Management and Scapular Dyskinesis
Ch32 Arthroscopic Treatment of Multidirectional Instability - Surgical Technique

Ch33 Open Treatment of Multidirectional Instability - Surgical Technique

SECTION 5: REVISION INSTABILITY AND SPECIAL TOPICS

Ch34 Instability Treatment Failure - Common Reasons and Prevention

Ch35 Rotator Interval - Considerations and Techniques for Instability

Ch36 Extensive Labral Tears - Pathology and Surgical Treatment

Ch37 Nerve Injuries with Instability Procedures - Prevention and Management

Ch38 Subscapularis Deficiency after Instability Procedures - Prevention and Management

Ch39 Capsular Deficiency with Recurrent Instability

Ch40 Glenohumeral Stiffness and Arthritis after Instability Surgery - Causes and Surgical Treatment

Ch41 Recognition and Management of Combined Instability and rotator Cuff Tears - Surgical Management

Ch42 The Patient with Hyperlaxity and Shoulder Instability - Ehlers Danlos and Other Disorders

Ch 43 Management of Chronic Shoulder Dislocations
