# Table of Contents:

**PART I: Molecular and Cellular Basis of Hematology**

1. Anatomy and Pathophysiology of the Gene
2. Genomic Approaches to Hematology
3. Regulation of Gene Expression, Transcription, Splicing, and RNA Metabolism
4. Protein Synthesis, Processing, and Trafficking
5. Protein Architecture: Relationship of Form and Function
6. Signaling Transduction and Regulation of Cell Metabolism
7. Pharmacogenomics and Hematologic Diseases

**PART II: Cellular Basis of Hematology**

8. Hematopoietic Stem Cell Biology
9. Hematopoietic Microenvironment
10. Cell Adhesion
11. Hematopoietic Cell Trafficking and Chemokines
12. Dynamic Interactions between Hematopoietic Stem and Progenitor Cells and the Bone Marrow: Current Biology of Stem Cell Homing and Mobilization
13. Vascular Growth in Health and Disease
14. Principles of Cytokine Signaling
15. Control of Cell Division
16. Cell Death

**PART III: Immunologic Basis of Hematology**

17. Overview and Compartmentalization of the Immune System
18. B-Cell Development
19. T-Cell Immunity
20. Natural Killer Cell Immunity
21. Dendritic Cell Biology
22. Complement and Immunoglobulin Biology
23. Tolerance and Autoimmunity

**PART IV: Disorders of Hematopoietic Cell Development**
24 Biology of Erythropoiesis, Erythroid Differentiation, and Maturation
25 Granulocytosis and Monocytosis
26 Thrombocytosis
27 Inherited Forms of Bone Marrow Failure
28 Aplastic Anemia
29 Paroxysmal Nocturnal Hemoglobinuria
30 Acquired Disorders of Red Cell, White Cell, and Platelet Production

PART V: Red Blood Cells
31 Pathobiology of the Human Erythrocyte and Its Hemoglobins
32 Approach to Anemia in the Adult and Child
33 Pathophysiology of Iron Homeostasis
34 Disorders of Iron Homeostasis: Iron Deficiency and Overload
35 Anemia of Chronic Diseases
36 Heme Biosynthesis and Its Disorders: Porphyrias and Sideroblastic Anemias
37 Megaloblastic Anemias
38 Thalassemia Syndromes
39 Pathobiology of Sickle Cell Disease
40 Sickle Cell Disease - Clinical Features and Management
41 Hemoglobin Variants Associated with Hemolytic Anemia, Altered Oxygen Affinity, and Methemoglobinemias
42 Red Blood Cell Enzymopathies
43 Red Blood Cell Membrane Disorders
44 Autoimmune Hemolytic Anemia
45 Extrinsic Nonimmune Hemolytic Anemias

PART VI: Non-Malignant Leukocytes
46 Neutrophilic Leukocytosis, Neutropenia, Monocytosis and Monocytopenia
47 Lymphocytosis, Lymphocytopenia, Hypergammaglobulinemia and Hypogammaglobulinemia
48 Disorders of Phagocyte Function
49 Congenital Disorders of Lymphocyte Function

50 Histiocytic Disorders

51 Lysosomal Storage Diseases: Perspectives and Principles

52 Infectious Mononucleosis and Other Epstein-Barr Virus-Associated Diseases

PART VII: Hematologic Malignancies

53 Progress in the Classification of Myeloid Neoplasms: Clinical Implications

54 Conventional and Molecular Cytogenetic Basis of Hematologic Malignancies

55 Pharmacology and Molecular Mechanisms of Antineoplastic Agents for Hematologic Malignancies

56 Radiation Therapy in the Treatment of Hematologic Malignancies

57 Pathobiology of Acute Myeloid Leukemia

58 Clinical Manifestations and Treatment of Acute Myeloid Leukemia

59 Myelodysplastic Syndromes: Biology and Treatment

60 Allogeneic Hematopoietic Stem Cell Transplantation for Acute Myeloid Leukemia and Myelodysplastic Syndrome in Adults

61 Acute Myeloid Leukemia in Children

62 Myelodysplastic and Myeloproliferative Neoplasms in Children

63 Pathobiology of Acute Lymphoblastic Leukemia

64 Clinical Manifestations and Treatment of Acute Lymphoblastic Leukemia in Children

65 Acute Lymphoblastic Leukemia in Adults

66 Chronic Myeloid Leukemia

67 The Polycythemias

68 Essential Thrombocythemia

69 Primary Myelofibrosis

70 Eosinophilia, Eosinophil-Associated Diseases, Chronic Eosinophil Leukemia, and the Hypereosinophilic Syndromes

71 Mast Cells and Systemic Mastocytosis

72 The Pathologic Basis for the Classification of Non-Hodgkin and Hodgkin Lymphomas

73 Origins of Hodgkin Lymphoma
99 Principles of Cell-Based Genetic Therapies
100 Mesenchymal Stromal Cells
101 T Cell Therapy of Hematological Diseases
102 Natural Killer Cell-Based Therapies
103 Dendritic Cell Therapies

PART X: Transplantation
104 Overview of Hematopoietic Cell Transplantation
105 Indications and Outcome of Allogeneic Hematopoietic Cell Transplantation for Hematologic Malignancies in Adults
106 Unrelated Donor Hematopoietic Cell Transplantation
107 Haploidentical Hematopoietic Cell Transplantation
108 Unrelated Donor Cord Blood Transplantation for Hematologic Malignancies
109 Graft-versus-Host Disease and Graft-versus-Leukemia Responses
110 Complications After Hematopoietic Stem Cell Transplantation

PART XI: Transfusion Medicine
111 Human Blood Group Antigens and Antibodies
112 Principles of Red Blood Cell Transfusion
113 Principles of Platelet Transfusion Therapy
114 Human Leukocyte Antigen and Human Neutrophil Antigen Systems
115 Principles of Neutrophil (Granulocyte) Transfusions
116 Principles of Plasma Transfusion: Plasma, Cryoprecipitate, Albumin, and Immunoglobulins
117 Preparation of Plasma-Derived and Recombinant Human Plasma Proteins
118 Transfusion Therapy for Coagulation Factor Deficiencies
119 Hemapheresis
120 Transfusion Reactions to Blood and Cell Therapy Products
121 Transfusion-Transmitted Diseases
122 Transfusion Medicine in Hematopoietic Stem Cell and Solid Organ Transplantation
123 Pediatric Transfusion Medicine
150 Peripheral Artery Disease
151 Antithrombotic Drugs
152 Disorders of Coagulation in the Neonate

**PART XIII: Consultative Hematology**

153 Hematologic Changes in Pregnancy
154 Hematologic Manifestations of Childhood Illness
155 Hematologic Manifestations of Liver Disease
156 Hematologic Manifestations of Systemic Disease: Renal Disease
157 Hematologic Manifestations of Cancer
158 Integrative Therapies in Patients with Hematologic Diseases
159 Hematologic Manifestations of HIV/AIDS
160 Hematologic Aspects of Parasitic Diseases
161 Hematologic Problems in the Surgical Patient: Bleeding and Thrombosis
162 The Spleen and Its Disorders
163 Hematology in Aging

164 (Online Only) Resources For The Hematologist: Interpretive Comments and Selected Reference Values for Neonatal, Pediatric, and Adult Populations
