Table of Contents

**Fundamentals**

1 Introduction  
1 Periodontal Diseases  
2 The Clinical Course of Untreated Periodontitis  
3 Periodontitis—Concepts of Therapy

7 Structural Biology  
8 Gingiva  
10 Epithelial Attachment  
12 Connective Tissue Attachment  
14 Root Cementum  
16 Osseous Support Apparatus  
18 Blood Supply of the Periodontium  
19 Innervation of the Periodontium  
20 The Coordinated Functions of the Periodontal Structures

21 Etiology and Pathogenesis  
22 Periodontitis—a Multifactorial Disease

23 Microbiology  
24 Biofilm—Plaque Formation on Tooth and Root Surfaces  
25 Supragingival Plaque  
26 Natural Factors Favoring Plaque Retention  
27 Iatrogenic Factors Favoring Plaque Retention  
28 Subgingival Plaque  
29 Bacterial Invasion Into Tissue?  
30 Classification of Oral Microorganisms  
31 Cell Walls of Gram-Positive and Gram-Negative Bacteria  
32 Periodontitis—Classical or Opportunistic Infection?  
33 Putative Periodontopathic Bacteria  
34 Virulence Factors  
34 Virulence Transfer  
36 Marker Bacteria in Periodontitis  
37 Pathogenic “Single Fighters” vs. Pathogenic Complexes?  
38 Endotoxin—Lipopolysaccharide (LPS)  
38 Interaction Between LPS and the Host

39 Pathogenesis—Reactions and Defense Capabilities of the Host  
40 New Concepts of Pathogenesis  
41 Host Response—Mechanisms and “Participants”  
42 Non-specific, Congenital Immunity—the First Line of Defense  
43 Specific, Acquired Immunity—the Second Line of Defense  
44 Components of the Immune System—Summary  
45 Interactions Between Non-specific and Specific Immunity  
46 Regulatory Cell Surface Molecules: Markers, Receptors  
47 Cytokines  
49 Eicosanoids—Prostaglandins and Leukotrienes  
50 Enzymatic Mechanisms—Matrix Metalloproteinas  
51 Risk for Periodontitis—the Susceptible Host  
52 Genetic Risk Factors—Diseases, Defects, Variations  
53 Alterable Risk Factors, Modifying Co-Factors  
55 Pathogenesis I—Initial Inflammatory Reactions  
56 Pathogenesis II—Histology  
58 Pathogenesis III—Molecular Biology  
60 Attachment Loss I—Destruction of Connective Tissue  
61 Attachment Loss II—Bone Resorption  
62 Pathogenesis—Clinical Features: From Gingivitis to Periodontitis  
63 Cyclic Course of Periodontitis  
64 Periodontal Infections and Systemic Diseases  
65 Etiology and Pathogenesis—Summary

67 Indices  
70 Papilla Bleeding Index—PBI  
71 Periodontal Indices  
72 Community Periodontal Index of Treatment Needs—CPITN  
73 Periodontal Screening and Recording—PSR

74 Epidemiology  
74 Epidemiology of Gingivitis  
75 Epidemiology of Periodontitis

76 WHO Studies

**Disease Entities and Diagnosis**

77 Types of Plaque-associated Periodontal Diseases  
77 Gingivitis—Periodontitis  
78 Classification of Periodontal Diseases—Nomenclature

80 Gingivitis  
81 Histopathology  
82 Clinical Symptoms  
82 Mild Gingivitis  
83 Moderate Gingivitis  
84 Severe Gingivitis  
85 Ulcerative Gingivitis/Periodontitis  
86 Histopathology  
87 Clinical Symptoms—Bacteriology  
88 Ulcerative Gingivitis (KUG)  
89 Ulcerative Periodontitis (NUP)  
90 Ulcerative Gingivoparodontitis—Therapy

91 Hormonally Modified Gingivitis  
92 Severe Pregnancy Gingivitis—Graliv Epulis  
94 Pregnancy Gingivitis and Phenytoin

95 Periodontitis  
96 Pathobiology—the Most Important Forms of Periodontitis  
96 Type II  
97 Type II B  
97 Type II A  
97 Type IV B  
98 Pathomorphology—Clinical Degree of Severity  
99 Pockets and Loss of Attachment  
100 Intra-alveolar Defects, Infra-bony Pockets  
102 Furlong Involvement  
104 Histopathology  
105 Additional Clinical and Radiographic Symptoms  
106 Chronic Periodontitis—Mild to Moderate  
108 Chronic Periodontitis—Severe  
112 Aggressive Periodontitis—Ethnic Contributions?  
114 Aggressive Periodontitis—Acute Phase  
116 Aggressive Periodontitis—Initial Stage  
118 Prepubertal Periodontitis—PP (Aggressive Periodontitis)

119 Oral Pathologic Alterations of Gingiva and Periodontium*  
120 Primarily Gingival Alterations (Type I B)  
120 Gingival and Periodontal Alterations (Type IV A/B)  
121 Phenylalan—Induced Gingival Overgrowth  
122 Dihydropyridine-induced Gingival Overgrowth  
123 Cyclosporine-induced Gingival Overgrowth  
124 Gingival Hyperplasia Following Combined Drug Therapies  
125 Benign Tumors—Epulis  
126 Benign Tumors—Fibrosis, Exostosis  
127 Malignant Tumors  
128 Gingivosis / Pemphigoid  
128 Pemphigus vulgaris  
129 Lichen planus: Reticular and Erosive  
130 Leukoplakia, Pre-Cancerous Lesions—Oral Granulomatases  
131 Herpes—Herpetic Gingivostomatitis  
132 Periodontitis with Systemic Diseases (Type IV D)—Diabetes Type I and Type II  
134 Periodontitis Associated with Systemic Diseases (Type IV B)  
134 Down Syndrome, Trisomy 21, “Mongolism”  
136 Pre-pubertal Periodontitis Associated with Systemic Disease  
137 Papillon-Lefèvre Syndrome (Type IV B)  
138 Papillon-Lefèvre Syndrome—“An Exception for Every Rule”*

139 HIV Infection—AIDS  
140 HIV Disease—Epidemiology  
141 Classification and Clinical Course of HIV Disease  
142 Oral Manifestations of HIV Disease  
143 Bacterial Infections in HIV  
144 Fungal Infections  
145 Viral Infections  
146 Neoplasms  
147 HIV-Associated Lesions of Unknown Etiology  
148 Invasion and Replication of the HI Virus—Hurdles for Systemic Medical Treatment  
149 Treatment of the HIV Patient—Pharmacologic Aspects  
150 HIV—Treatment of Opportunistic Infections  
150 Infection Prevention and Post-exposure Prevention—The Dental Team  
151 Treatment of HIV—Periodontitis

155 Gingival Recession  
156 Fenestration and Dehiscence of the Alveolar Bone  
157 Clinical Symptoms  
158 Recession—Localized  
159 Recession—Generalized
## Table of Contents

160 Clinical Situations Resembling Recession  
161 Recession—Diagnosis  
162 Measurement of Recession (Jahnke)  
163 Classification of Recession (Miller)  
164 Consequences of Recession  

165 Data Collection—Diagnosis—Prognosis  
166 Data Collection—Examinations  
167 General Patient Health History  
168 Special Patient Health History  
169 Classic Clinical Findings  
170 Pocket Probing—Probing Depth, Clinical Attachment Loss  
171 Pocket Probing—Periodontal Probes  
172 Calculus  
173 Fissure Involvement—Horizontal and Vertical Fissure Involvement  
174 Tooth Mobility—Functional Analysis  
175 Radiography  

178 Additional Diagnosis—Tests  
180 Microbial Diagnosis—Test Methods  
181 Clinical Microbial Diagnosis—Cultures  
182 New Diagnostic Techniques—Evaluation  
183 Molecular Biological Tests  
184 Bacterial Probe Test—Practical IAI PadoTest  
185 DNA/RNA Probe Tests—IAI PadoTest 4·5  
186 Immunological Tests—Antigen-Antibody Reactions  
187 Enzymatic Bacterial Tests—BANA Test  

188 Tests of the Host Response—Risks  
189 Genetic Risk—Test for IL-1 Gene Polymorphism  
190 IL-1 Gene Test—Technique, Evaluation  
191 Risk Factor IL-1-positive Genotype—Additional Risk Factors  
192 Poor Oral Hygiene as a Risk Factor—Bleeding on Probing (BOP)  
193 Periodontal Risk Assessment—Individual Risk Profile  
194 Diagnostic Data Collection—Periodontal Charting, I and II  
195 Computer-Enhanced Charting—the Florida Probe System  
196 Diagnosis  
197 Prognosis  

198 Prevention—Prophylaxis  
199 Definition: Prevention—Prophylaxis  
199 Prevention of Gingivitis and Periodontitis  

### Therapy

201 Treatment of Inflammatory Periodontal Diseases  
202 Therapeutic Concepts and Techniques  
203 Therapy—Problems  
204 Periodontitis—Therapeutic Goals, Therapeutic Outcomes  

205 Periodontal Wound Healing  
206 Wound Healing and Regeneration—Possibilities  
208 Treatment Planning—Sequence of Treatment  
209 Pre-phase—Systemic Health, Oral Hygiene  
210 General Course of Therapy—Individual Planning  

211 Systemic Pre-phase  
212 Evaluation—Can the Patient be Safely Treated?  
213 Bacteremia—Endocarditis Prophylaxis  
214 Dental Procedures Carrying the Risk of Bacteremia  
215 Diabetes mellitus (DM)—Risk Factor for Periodontitis  
216 Smoking—An Alterable Risk Factor  

217 Emergency Treatment  
221 Phase 1 Therapy  
222 Case presentation—Motivation—Information  
223 Initial Treatment  
224 Oral Hygiene by the Patient  
225 Motivation—Gingival Bleeding  
226 Plaque Disclosing Agents  
227 Toothbrushes  
228 Toothbrushing Technique  
229 The Solo Technique—A Different Way to Brush Your Teeth  
230 Electric Toothbrushes  
231 Interdental Hygiene  
232 Dentifrices  
233 Chemical Plaque Control—“Soft Chews” Prevention  
236 Irrigators  

237 Oral Hygiene for Halitosis  
238 Possibilities, Successes and Limitations of Oral Hygiene  

239 Initial Therapy  
240 Supragingival tooth cleaning—Power-driven Instruments  
241 ... and their Use  
242 Supragingival Tooth Cleaning—Hand Instruments, Prophy Pastes  
243 ... and their Use  
244 Creating of Conditions that Enhance Oral Hygiene—Removal of Iatrogenic Irritants  
245 Correction of Iatrogenic Irritants—Bridge Pontics  
246 Removal of Natural Plaque-retentive Areas—Odontoplasty of Grooves, Depressions, Irregularities  
248 Reduction of Natural Plaque-retentive Areas—Crowding: Morphologic Odontoplasty  

249 Treatment of Plaque-elicited Gingivitis  
252 Gingivitis Treatment  

253 Phase 1 Therapy  
254 Non-Surgical, Anti-Infectious Therapy—Goals of Treatment  
255 Antimicrobial Therapy—Combating the Reservoir  
256 Root Planning—With or without Curettage?  
257 Closed Therapy—Indication, Instrumentation  
258 Hand Instruments for Scaling and Root Planing—Curettes  
259 Powered Instruments for Debridement  
260 Gracey Curettes—Areas of Use  
262 Hand Instruments for Special Problems—Curettes  
263 Practical Scaling Technique with Gracey Curettes—Systematic Approach  
265 Instrument Sharpening  
269 Manual Sharpening of Hand Instruments  
270 Automated Sharpening  
271 Subgingival Debridement—Closed Root Cleaning  
272 Closed Therapy in Quadrant I  
277 ... and in the Rest of the Dentition?  
278 Limitations of Closed Therapy  
282 Possibilities and Limitations of Closed Therapy  

283 FMT—“Full Mouth Therapy”  
284 FMT—Instrumental/Mechanical and ...  
283 ... Pharmacologic Therapy  
284 FMT—Radiographic Results  
285 FMT—Statistical/Numerical Results  

287 Medication  
287 Anti-Infectious Supportive Therapy—Antibiotics in Periodontitis Therapy  
288 Decision-Making Criteria—When to Use Antibiotics?  
290 Antibiotics—Bacterial Sensitivity and Resistance  
291 Systemic Versus Local (Topical) Antimicrobial Therapy  
292 Local (Topical) Antimicrobial Therapy—“Controlled Release Drugs” (CRD)  
294 Host Response/Reaction—Modulating Substances  

295 Phase 2 Therapy  
296 Periodontal Surgery—Corrective Phase  
297 Purposes and Goals of Periodontal Surgery  
297 Patient Selection  
298 Factors that Influence the Treatment Result  
299 Methods of Periodontal Surgery and their Indications  
300 Principles of Various Treatment Modalities—Advantages and Disadvantages  
301 Perioperative Treatment—Post-operative Care  

303 Flap Procedures—Open Treatment  
304 Flap Design—Incisions  
305 Instruments for Flap Surgery  
306 Needles and Suture Materials  
307 Sutures and Knots  
308 Frequently Used Suture Placements  

309 “Access Flap” Surgery, Open Flap Debridement (OFD)—Modified Widman Flap (MWF)  
310 Principles of the Modified Widman Procedure—Ramfjord Technique  
312 Principles of the MWF—Occlusal View  
313 “Access Flap”/Modified Widman Procedure—Case Presentation  
317 “Access Flap”/Modified Widman Procedure  
318 Long-term Results Following Various Treatment Modalities  
319 Wedge Excision Distal to a Lone-standing Tooth—Principles  
320 Wedge Excision—Most Distal Tooth  

322 Regenerative Methods  
324 Intra-Alveolar Pockets—Anatomy of the Defect  
326 Bone Regeneration without “Transplantation”  
327 Filling Materials for Intra-Alveolar Pockets—Transplants/Implants  
328 Instruments for Harvesting Autogenous Bone ...  
329 ... and Their Use  
330 Implantation (Transplantation?) of Autogenous Bone  
332 Bone Replacement Materials—“Fillers”
Resective Methods

Guided Tissue Regeneration—GTR

GTR with Filling Material and a Membrane—“Bio-Gide” and “Bio-Oss Collagen”

Regeneration Using Proteins, Growth Factors and Differentiation Factors

GTR with Filling Material and a Membrane—“Bio-Gide” and “Bio-Oss Collagen”

Alveolar Ridge Defects—Surgical Corrections—Methods

Periodontics—Endodontics

Supporting Therapies

Dental Implants—Implant Therapy

Appendices

Geriatric Periodontology—The Periodontium in the Elderly

Classification of Periodontal Diseases

New Classification of Periodontal Diseases (1999)

Changes—Comparing the 1989 and 1999 Classifications

Recall—Personalized Periodontology
