**TABLE OF CONTENTS**

SECTION A: Nutrition and neonatal/infant disease

1. Growth and Body Composition in Children with Chronic Disease
   Kelly A. Dougherty
   Virginia A. Stallings

2. Nutritional support in inborn errors of metabolism
   Juan J. Diaz
   Marilyn Bernard
   Lauren Furuta
   Clifford Lo

3. Ketogenic Diet as treatment option for infants with intractable epileptic syndrome
   Elles J.T.M. van der Louw
   Coriene E.Catsman-Berrevoets
   Dorine A.M van den Hurk
   Joanne F. Olieman

4. Short Bowel Syndrome: Management and treatment
   Joanne F. Olieman
   Hanneke IJsselstijn
   Barbra A. de Koning
   Dick Tibboel

5. Percutaneous endoscopic gastrostomy
   Patricia Davidson
   Scott Nightingale

6. Nutritional support in Crohn’s disease
   Anthony E Wiskin
   R Mark Beattie

7. Nutritional requirements and support in liver disease
   Deirdre A Kelly
   Susan Protheroe
   Sara Clarke

8. Normal and aberrant craniofacial development and nutrition in infants
   Anne O’Connell

9. Role of gangliosides in neurological development and the influence of dietary sources
   R Mendez-Otero
   P M Pimentel-Coelho
   S Ukraftsev
   Paul McJarrow
10. Dietary methods to treat acute gastroenteritis
Sylvia del Castillo
Kristi Catton

11. Celiac disease in infants: Prevention and dietary treatment
Mukadder Ayse Selimoglu

12. The Nutritional aspects of intestinal failure therapy
Jeffrey A. Rudolph

13. Hormone therapy to improve growth in infants with chronic kidney disease
Natalia Mejía-Gaviria
Flor Ángel Ordoñez
Fernando Santos

14. Nutrition of infants and HIV
Lars T. Fadnes
Tanya Doherty
Debra Jackson
Ingunn Marie S. Engebretsen
Ameena Goga

15. Undernutrition and hearing impairment
Bolajoko O. Olusanya

16. Nutritional management of diabetes mellitus in Infants and children
Ruth M. Ayling

17. Nutritional Considerations for Infants and Children during Critical Illness and Surgery
Joyce L. Owens
Sheila J. Hanson
Jennifer McArthur

Section B. GI tract Considerations

18. Parenteral nutrition in infants and children
Consuelo Pedrón-Giner
Cecilia Martinez Costa
Jose Manuel Moreno Villares

19. Home parenteral nutrition
Consuelo Pedrón-Giner
Jose Manuel Moreno Villares

20. The role of colonic flora in infants
Carlos H. Lifschitz

21. Pro and prebiotics for the prevention and treatment of diseases in childhood
Elisabeth Haschke-Becher
Ferdinand Haschke
22. Prebiotics and Probiotics on infant health and growth  
Flavia Indrio  
Giuseppe Riezzo

Section C.  Hormones and lipids: growth and development of infants

23. General area of lipid composition of diets to optimize growth and development of premature infants  
Girish Deshpande  
Rajesh Maheshwari

24. Dietary management of hypercholesterolemia in infants and children  
Corina Hartman  
Raanan Shamir

25. Adipose tissue, its hormones and infant development  
Mauro Bozzola  
Cristina Meazza

26. Role of fatty acids in the neurological development of infants  
Alan S. Ryan  
Elizabeth K. Entin  
James P. Hoffman  
Connye N. Kuratko  
Edward B. Nelson

27. Obesity in Infancy and Childhood: diagnosis, incidence and strategy for change  
Ruth M. Ayling

28. Infant growth and adult obesity: relationship and factors affecting them  
Ulla Sovio  
Evangelia E Ntzani  
Ioanna Tzoulaki

29. Maternal behaviour and infant weight  
John Worobey
