

Contents

Chapter 1

Vascular anatomy of the maxillaries in relationship to bone regenerative procedures

S. Taschieri, S. Corbella

Introduction	1
Carotid artery	2
Maxillary artery	2
Upper and lower jaw	4
Vascularization of the maxillary sinus	4
Vascularization of the anterior jaw	6

Chapter 2

Fundamentals of oral implantology

S. Corbella, S. Taschieri

Introduction	9
Characteristics of the subject	10
Surgical procedure	13
Timing of implant placement	14
General characteristics of the prosthesis and timing of prosthetic loading	15
Implant complications	15

Chapter 3

Guided bone regeneration: rationale and fundamental concepts

E. Minetti

Development and structure of bone. Types of bone and structural organization	19
Composition of the bone	20
Bone matrix. Cortical bone, medullary bone, lamellar bone, immature bone	22
Guided Bone Regeneration (GBR)	24
Bone growth factors	26
Scaffold	27
Dentin	31

Chapter 4

The tooth as a source of bone graft

E. Minetti

Embryogenesis and tooth structure	33
Tooth development	36
Mineralization of dental tissues	36
Enamel	38
Dentin	39
Cementum	40
History and literature review	40

Chapter 5

In vitro studies with dental materials

E. Minetti

Analysis of the type of grinding	61
Liquid evaluation	62
Dentin treatment procedure chosen after the tests carried out	74
Bacterial load test	75
Evaluation of the volume needed to completely remove active liquids (HCl and H ₂ O ₂)	76
Deciduous tooth treatment	78
Tooth weight	81

Chapter 6

Tools and procedures for processing bone substitute from dental origin

E. Minetti

Proposed procedures	85
Devices on the market	87
Protein denaturation	92
CE marking	94

Chapter 7**Histological characteristics of the bone substitute of dental origin: scientific evidence** 97**Biomedical aspects of cyto-histology of bone tissue** ... 97*A. Casasco, M. Casasco*

Histology of the bone tissue 97

Histological methods of studying bone tissue 98

Specific cells of bone tissue 99

Composition of the fundamental substance of the bone ... 100

The bone lamella, an elementary structure of the bone tissue 101

Histogenesis of bone tissue 101

How bone mineralization occurs 103

The plasticity of bone tissue and its clinical implications 104

Review of published articles with histological examples 105*E. Minetti***Examples of histological material of dental origin** 105*P. Savadori***Preliminary data from ongoing studies** 112*E. Minetti*

Analysis over time (<4 months, 4–6 months, >6 months) 112

Analysis by operator 113

Analysis by surgical technique. Membranes and platelet derivatives 113

Distribution of the results of histomorphometric analysis ... 113

Comparison of resorption with other materials mixed with the tooth 122*E. Minetti*

Radiographic images 124

Clinical cases 131

T. Beca Campoy, F. Bromuri, M. Contessi, U. Gambardella, E. Giacometti, H.K.L. Ho, M. Libertucci, E. Minetti, J. Santillana, J. Schmitz

Alveolar preservation 132

Alveolar preservation with membrane 132

Clinical case 1 132

Clinical case 2 135

Alveolar preservation with membrane, platelet derivatives 137

Clinical case 3 137

Clinical case 4 140

Alveolar preservation without membrane 143

Clinical case 5 143

Clinical case 6 145

Crest preservation 148

Ridge preservation with membrane 148

Clinical case 7 148

Clinical case 8 151

Clinical case 9 153

Clinical case 10 155

Clinical case 11 157

Clinical case 12 159

Ridge preservation with membrane, platelet derivatives 162

Clinical case 13 162

Clinical case 14 164

Clinical case 15 166

Sinus lift 169

Clinical case 16 169

Clinical case 17 171

Tunnel technique 173

Clinical case 18 173

Periodontology 176

Clinical case 19 176

Alveolar preservation with protective polypropylene support 178

Clinical case 20 178

Appendix 181**Conclusions** 187
