

INDEX:

Ultrasound features that characterize the normal and the pathological thyroid
What does the ultrasound normoechoic and hypoechoic features correspond to in reality?
Autoimmune thyroiditis
Nodes and pseudonodes in thyroiditis
Non-autoimmune thyroiditis
A pathologist's view of thyroid inflammatory conditions
Nodular pathology: "the new lexicon"
Ultrasound assessment of risk of thyroid malignancy: the risk stratification systems
How to select patients for needle biopsy?
Ultrasound-guided aspiration biopsy with thin needle and core needle biopsy
Microscopic tissue changes following needle aspiration procedures
Cytologic classification of thyroid nodules
Surgical techniques
The role of minimally invasive ablative technique
Radioactive isotope therapy of thyroid neoplastic lesion
Autoimmune hyperfunctioning thyroid disorders
The study of nodular formations in hyperfunctioning thyroid disorders
Therapeutic strategy in cases of complex pathology
Radioisotope therapy of thyroid hyperfunction
Ultrasound in the pediatric age
The report in thyroid diseases
Ultrasound evaluation of inflammatory, metastatic, and primary neoplastic lymph node pathology of the neck
Ultrasound and scintigraphy in the instrumental diagnosis of hyperparathyroidism
Inflammatory, lithiasic, and nodular pathology of the salivary gland
Evaluation of neck masses
Cyto-histological assessment of neck lesions
Gender medicine in thyroid disease
Inflammatory thyroid pathology during the covid-19 pandemic: a summary of experiences
