

INDEX:

The Aortic Team: from concept to real application

Vincent Rimbaut

The morphometric planning: recent developments and future directions to improve planning in complex aortic endorepair

Alejandro R. Rio, Alba Mendez, Maria Bascuas, Nilo J. Mosquera Arochena, Rita Calviño

The hybrid room setup: how can we manage the workflow in the hybrid room for different scenarios in CAER

Radu I. Toader, André F. Truong, Fiona Rohlfss

The access: best evaluation, techniques, and bailouts for success in challenging access

Gaddiel Mozzetta, Davide Esposito, Martina Bastianon, Caterina Melani, Endri Sila, Fabio Grimaldi, Andrea Savio, Enrica Bosisio, Giuseppe Baldino, Giovanni Pratesi

Postoperative care in complex aortic endovascular repair (CAER): the role of anesthesiologist and ICU specialist

Purificación Matute Jiménez

Dealing with ascending and aortic arch involvement: the CMD options

Mario Lescan, Martin Czerny, Stoyan Kondov

Dealing with ascending and aortic arch involvement: the off-the-shelf options

Andrea Spertino, Francesco Squizzato, Elda Chiara Colacchio, Michele Piazza, Michele Antonello

Dealing with ascending and aortic arch involvement: the PMEG options

Jesus Porras, Andres Figueroa, Shadman Mirza Baig, Carlos H. Timaran

Endovascular approach of aortic emergencies with arch involvement

Evangelos Maroulis, David Khangholi, Jan Stana, Nikolaos Konstantinou, Nikolaos Tsilimparis

Dealing with the visceral arteries: tips and tricks and bail-out techniques for difficult cannulations

Constantijn E.V.B. Hazenberg, Martin Teraa, Gemmi Sufali, Joost A. van Herwaarden

The Artivion platforms for visceral aortic involvement: strengths and weaknesses

Eliza Pleban, Piotr Szopiński

The Cook medical platforms for visceral aortic involvement: strengths and weaknesses

Lorenz Meuli, Timothy Andrew Resch

The TERUMO Aortic Platforms for visceral aortic involvement: strengths and weakness

Martina Bastianon, Davide Esposito, Giovanni Pratesi, Vincent Jongkind, Johanna Hilda Nederhoed, Arjan Hoksbergen, Kak Khee Yeung

The PMEGs options for platforms for visceral aortic involvement: advantages and limitations

Javier Río, Fernando Garcia-Boyano, Álvaro Moreno, Elena Menéndez

Aneurysm dynamics and stability of endograft and bridging stent-grafts after CAER

Giovanni B. Torsello, Stefano Fazzini, Giovanni F. Torsello

The role of EndoAnchors in CAER procedures

Cornelis G. Vos, Andrés Reyes Valdivia, Jean M. Panneton, William D. Jordan, Jean-Paul P.M. de Vries

Off-the-shelf devices for visceral aortic involvements: advantages and limitations

Enrico Gallitto, Antonio Cappiello, Antonino Di Leo, Mauro Gargiulo

Endovascular approach of aortic emergencies with visceral aortic involvement

Angelos Karelis, Björn Sonesson, Nuno V. Dias

Endovascular approaches for chronic aortic dissection

Jean-Marc Alsac

The role of complex aorta endorepair (CAER) after failed standar endovascular aortic repair

Paolo Spath, Enrico Gallitto, Carmine Polisenio, Federica Campana, Rodolfo Pini, Gianluca Faggioli, Mauro Gargiulo

Ischemic complications after complex aorta endorepair: prevention and management

Bruno P. Schmid, Lucas R. Kanamori, Emanuel R. Tenorio, Gustavo S. Oderich

Bridging stent related complications: prevention and management

Inès Zeknini, Claire Webster, Bérard Xavier, Eric Ducasse, Caroline Caradu

The revolution of FEVAR bridging stents: from “off-label” to “on-label” to a dedicated device

Anne Daniels, Barend Mees, Stéphan Haulon

Endovascular training and learning curve for CAER

Gabriel Lopez-Pena, Celia Riga, Raj Mamidi, Jason Arthur Lawson, Colin Bicknell
