| <i>Preface</i>  | V         |  |  |
| <i>Authors</i>  | VII       |  |  |
| <b>1. GENERAL INFORMATION</b>   | <b>1</b>  |  |  |
| • Introduction to other competitive local adjuvant and ablation technique                               | 1         |  |  |
| – Definition and principle  | 1         |  |  |
| – Radiofrequency ablation   | 1         |  |  |
| – Microwave ablation  | 1         |  |  |
| – Laser therapy   | 2         |  |  |
| – High-intensity focused ultrasound   | 2         |  |  |
| – Irreversible electroporation  | 2         |  |  |
| – Alcoholic adjuvants   | 2         |  |  |
| – Phenol  | 2         |  |  |
| • The history of therapeutic hypothermia  | 4         |  |  |
| – From the dawn of civilization to the threshold of the industrial revolution                           | 4         |  |  |
| – The industrial era and the contribution of James Arnott   | 4         |  |  |
| – From Arnott to Irving S. Cooper and modern cryotherapy  | 5         |  |  |
| • Cryotherapy's fields of application   | 6         |  |  |
| – Skin tumors   | 6         |  |  |
| – Kidney tumors   | 6         |  |  |
| – Liver tumors  | 6         |  |  |
| – Tumors of the oral cavity and digestive tract   | 6         |  |  |
| – Breast tumors   | 6         |  |  |
| – Prostate tumors   | 6         |  |  |
| <b>2. BASIC SCIENCE</b>   | <b>9</b>  |  |  |
| • Cryotherapy as adjuvant/ablative procedure  | 9         |  |  |
| – The effects of cryotherapy  | 9         |  |  |
| – Mechanisms of cellular and tissue damage  | 10        |  |  |
| – Immunoreaction  | 12        |  |  |
| – Technical aspects   | 13        |  |  |
| • Cryotherapy and musculoskeletal system  | 15        |  |  |
| – Cortical versus medullary bone  | 15        |  |  |
| – Magnetic resonance imaging appearance after cryotherapy   | 17        |  |  |
| – Complications   | 17        |  |  |
| <b>3. CRYO-INDUCED IMMUNIZATION</b>   | <b>19</b> |  |  |
| • Mechanisms of immunization  | 19        |  |  |
| • Therapeutic effects and uses of cryo-induced immunization   | 20        |  |  |
| • Future directions   | 22        |  |  |
| <b>4. SURGICAL TECHNIQUE</b>  | <b>25</b> |  |  |
| • Main surgical applications  | 28        |  |  |
| <b>5. CLINICAL APPLICATIONS: BONE</b>   | <b>33</b> |  |  |
| • Cryotherapy as intraoperative adjuvant after curettage: standard procedure                            | 33        |  |  |
| • Local adjuvant treatment in bone tumors: giant cell tumor (GCT) of bone, cryotherapy and denosumab    | 55        |  |  |
| – Generalities  | 55        |  |  |
| – Giant cell tumor and denosumab  | 55        |  |  |
| – Treatment effects   | 55        |  |  |
| – Results   | 56        |  |  |
| – Strategy  | 58        |  |  |
| <b>6. CRYOTHERAPY AS AN ANTIHEMORRHAGIC OR SOLIDIFYING TREATMENT OF BONE TUMORS</b>                     | <b>73</b> |  |  |
| <b>7. INTRAOPERATIVE CRYOTHERAPY IN SOFT TISSUES TUMORS</b>   | <b>89</b> |  |  |
| • Option 1: cryotherapy as a local adjuvant   | 89        |  |  |
| • Option 2: intraoperative freezing of soft tissue mass for solidification and antihemorrhagic purposes | 90        |  |  |

|   |            |  |            |
|---|------------|--|------------|
| <b>8. CRYOTHERAPY AND COMBINED EFFECT</b>   | <b>97</b>  |  |            |
| <b>9. CELLULAR STERILIZATION AND REIMPLANTATION OF OSTEOARTICULAR SEGMENTS AFFECTED BY NEOPLASTIC PATHOLOGY</b> | <b>107</b> |  |            |
| • Introduction  | 107        |  |            |
| • Surgical techniques   | 107        |  |            |
| – Classic technique: resection and extracorporeal total immersion “free freezing”                               | 107        |  |            |
| – The Tsuchiya technique: partial resection and <i>in-situ</i> cryotherapy or “pedicle freezing”                | 108        |  |            |
| • Outcomes and discussion   | 110        |  |            |
| • Clinical results  | 112        |  |            |
| <b>10. Percutaneous procedures for palliative and therapeutic aims</b>  | <b>121</b> |  |            |
| • Indications   | 121        |  |            |
| • Surgical technique  | 122        |  |            |
| – Generalities  | 122        |  |            |
| – Probe insertion   | 124        |  |            |
|   |            | – Imaging guidance   | 124        |
|   |            | – Post-treatment imaging   | 125        |
|   |            | • Clinical results of percutaneous cryoablation for palliative purposes  | 125        |
|   |            | – Analgesic effect   | 125        |
|   |            | • Clinical results of percutaneous cryoablation for therapeutic purposes | 126        |
|   |            | – Bone tumors  | 126        |
|   |            | – Soft tissue tumors   | 128        |
|   |            | <b>11. COMPLICATIONS</b>   | <b>139</b> |
|   |            | • The main intra and postoperative complications: an overview            | 139        |
|   |            | – Infection  | 139        |
|   |            | – Cryo-induced damage of soft tissues                                    | 141        |
|   |            | – Cryo-induced bone damage   | 141        |
|   |            | – Joint degeneration   | 142        |
|   |            | – Injuries to the nerves and spinal cord                                 | 142        |
|   |            | <b>12. CRYOTHERAPY AND LOCAL RECURRENCE</b>                              | <b>147</b> |
|   |            | <b>13. THE CRIO2AR RESEARCH PROJECT</b>                                  | <b>151</b> |
