

Contents

- 1 The emerging role of cardiovascular imaging in the management of atherosclerotic coronary artery disease** **1**
Flavio Giuseppe Biccirè, Vito Ramazzotti, Simone Budassi, Riccardo Di Pietro, Alessandro Manzoli, Eloisa Arbustini, Francesco Prati
- 2 Searching for ischaemia: when and how to use invasive and non-invasive strategies** **12**
Andrea Picchi, Ugo Limbruno
- 3 The role of non-invasive imaging to improve risk stratification and guide therapeutic approaches** **23**
Alberico Del Torto, Gianluca Pontone
- 4 Dyslipidaemias: early diagnosis, risk management and improved outcomes** **36**
Marcello Arca, Laura D'Erasmus
- 5 Oral lipid-lowering therapy: the lower, the better with established and novel pharmacological opportunities** **49**
Arturo Cesaro, Vincenzo Acerbo, Paolo Calabrò
- 6 Strike early, strike strong: rationale for early intensive lipid-lowering therapy in ACS patients** **61**
Paola Gargiulo, Ermanno Nardi, Ciro Cotticelli, Pasquale Perrone Filardi
- 7 Atherosclerotic plaque regression and stabilisation with intensive lipid-lowering therapy** **68**
Flavio Giuseppe Biccirè, Ryota Kakizaki, Lorenz Räber
- 8 Atherosclerotic vulnerable or high-risk plaque: role of invasive treatment** **82**
Enrico Cerrato, Marco Lombardi, Simone Zecchino, Rocco Vergallo
- 9 Beyond LDL-C lowering: addressing the residual risk** **109**
Laura Gatto, Maria Pia di Bitonto, Matteo Lanciotti, Aurora Ferro, Lorenzo Scalia, Alessandro Battagliese, Maria Teresa Mallus
- 10 Atherosclerosis and atrial fibrillation: a dangerous relationship** **127**
Daniele Pastori, Danilo Menichelli
- 11 The relationship between healthcare professionals' contribution and improvement in cardiovascular patient care and outcomes** **137**
Gabriele Caggianelli, Valentina Micheluzzi, Rita Patrizia Tomasin, Francesca Ciarabellini, Giulia Colasanti, Valentina Vanzi, Ercole Vellone

Treating the atherosclerotic plaque 2.0
The key role of imaging and novel pharmacological approaches

VIII
